First Published in 2011. Routledge is an imprint of Taylor & Francis, an informa company.

MURA was responsible for a number of important contributions to the science of particle accelerators, including the invention of fixed field alternating gradient accelerators (FFAG). This title presents a history of the Midwestern Universities Research Association (MURA) during its lifetime from the early 1950s to the late 1960s.

In Bank Notes and Shinplasters, Joshua R. Greenberg shows how Americans accumulated and wielded monetary information in order to navigate the early republic's chaotic bank note system. He demonstrates that the shift to federally authorized paper money in the Civil War era eliminated the public's need for detailed financial knowledge.

George Washington is the most popular subject on coins, medals, tokens, paper money and postage stamps in America. Attempts to eliminate one-dollar bills from circulation, replacing them with coins, have been unsuccessful. Americans' reluctance to part with their "Georges" are beyond rational considerations but tap into deep-felt emotions. To discard one-dollar bills means discarding the metaphorical Father of His Country. Alexander Hamilton, the nation's first Secretary of the Treasury, said that monetary tokens were "vehicles of useful impressions." This numismatic history of George Washington traces the persistence of his image on American currency. These images are mostly from the late 18th-century. This book also offers a close look at the pictorial tradition in which these images are rooted.
