A mythmaker of the highest order, China Miéville has emblazoned the fantasy novel with fresh language, startling images, and stunning originality. Set in the same sprawling world of Miéville's Arthur C. Clarke Award-winning novel, Perdido Street Station, this latest epic introduces a whole new cast of intriguing characters and dazzling creations. Aboard a vast seafaring vessel, a band of prisoners and slaves, their bodies remade into grotesque biological oddities, is being transported to the fledgling colony of New Crobuzon. But the journey is not theirs alone. They are joined by a handful of travelers, each with a reason for fleeing the city. Among them is Bellis Coldwine, a renowned linguist whose services as an interpreter grant her passage—and escape from horrific punishment. For she is linked to Isaac Dan der Grimnebulin, the brilliant renegade scientist who has unwittingly unleashed a nightmare upon New Crobuzon. For Bellis, the plan is clear: live among the new frontiersmen of the colony until it is safe to return home. But when the ship is besieged by pirates on the Swollen Ocean, the senior officers are summarily executed. The surviving passengers are brought to Armada, a city constructed from the hulls of pirated ships, a floating, landless mass ruled by the bizarre duality called the Lovers. On Armada, everyone is given work, and even Remades live as equals to humans, Cactae, and Cray. Yet no one may ever leave. Lonely and embittered in her captivity, Bellis knows that to show dissent is a death sentence. Instead, she must furtively seek information about Armada's agenda. The answer lies in the dark, amorphous shapes that float undetected miles below the waters—terrifying entities with a singular, chilling mission. . . . China Miéville is a writer for a new era—and The Scar is a luminous, brilliantly imagined novel that is nothing short of spectacular. BONUS: This edition contains an excerpt from China Miéville's Embassytown.

A graceful and penetrating memoir interweaving the author's descent into depression with a medical and cultural history of this illness. At the age of twenty-seven, married, living in New York, and working in book design, Mary Cregan gives birth to her first child, a daughter she names Anna. But it's apparent that something is terribly wrong, and two days later, Anna dies—plunging Cregan into suicidal despair. Decades later, sustained by her work, a second marriage, and a son, Cregan reflects on this pivotal experience and attempts to make sense of it. She weaves together literature and research with details from her own ordeal—and the still visible scar of her suicide attempt—while also considering her life as part of the larger history of our understanding of depression. In fearless, candid prose, Cregan examines her psychotherapy alongside early treatments of melancholia, weighs the benefits of shock treatment against its terrifying pop culture depictions, explores the controversy around antidepressants and how little we know about them—even as she acknowledges that the medication saved her life—and sifts through the history of the hospital where her recovery began. Perceptive, intimate, and elegantly written, The Scar vividly depicts the pain and ongoing stigma of clinical depression, giving greater insight into its management and offering hope for those who are suffering.
