Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

The CAM coach brings together the writing partnership of Mark Shields and Simon Martin. Mark is a Nationally renowned NLP coach and Trainer and Simon a veteran natural health journalist and editor of CAM, the monthly magazine for practitioners of complementary and alternative medicine. Between them they have come up with a host of proven secrets, strategies and evidenced techniques of how to successfully set up and run a Complementary Health Practice. The CAM coach is based upon Mark Shields Coaching for Practitioners Series in CAM magazine which has been proven to help, coach, inspire and motivate many practitioners over the years This together with expert contributions from industry leading experts such as Mike Ash, Jayney Goddard, Anthony Haynes and Kate Neil makes the CAM Coach a unique and valuable resource for anyone looking to work successfully in the Complementary and Alternative Medicine industry

The author traces the boyhood enthusiasm for rockets that eventually led to a career at NASA, describing how he built model rockets in the family garage in West Virginia, inspired by the launch of the Soviet satellite Sputnik. Reprint.

Economics is everywhere. It's in business. It's in government. It's in our personal lives. Now, this ground-breaking textbook supplement brings this reality to the classroom. The book uses both contemporary and classic film and literature to illustrate 33 fundamental concepts in introductory economics. Designed for use in introductory economics courses, the clearly organized text brings both sides of the lectern closer together through real-life illustration of economic concepts in such favorites as Jaws, Legally Blonde, Casablanca, The Great Gatsby, The Scarlet Letter, and The Da Vinci Code. Each economic topic is described and terms are defined. A plot synopsis of a film or book sets the stage for each discussion. Using a detailed scene description, the authors then show how the scene illustrates the concept under study. Classroom discussion and assignments are facilitated through a series of questions that probe deeper.

Get to know the Spiritist concepts with an easy reading. Can we remember past lives? Is there life on other planets? Can we see the future in our dreams? How is life after death? Where is God's law written? Which are the powerful prayers? How can we ward off evil spirits? Who was Chico Xavier and Allan Kardec?

"Information Systems for Business and Beyond introduces the concept of information systems, their use in business, and the larger impact they are having on our world."--BC Campus website.

This book offers an informed and revealing account of NASA's involvement in the scientific understanding of the Earth's atmosphere. Since the nineteenth century, scientists have attempted to understand the complex processes of the Earth's atmosphere and the weather created within it. This effort has evolved with the development of new technologies -- from the first instrument-equipped weather balloons to multibillion-dollar meteorological satellite and planetary science programs. Erik M. Conway chronicles the history of atmospheric science at NASA, tracing the story from its beginnings in 1958, the International Geophysical Year, through to the present, focusing on NASA's programs and research in meteorology, stratospheric ozone depletion, and planetary climates and global warming. But the story is not only a scientific one. NASA's researchers operated within an often politically contentious environment. Although environmental issues garnered strong public and political support in the 1970s, the following decades saw increased opposition to environmentalism as a threat to free market capitalism. Atmospheric Science at NASA critically examines this politically controversial science, dissecting the often convoluted roles, motives, and relationships of the various institutional actors involved -- among them NASA, congressional appropriation committees, government weather and climate bureaus, and the military. -- Kristine C. Harper

Now in dynamic full color, SI ENGINEERING FUNDAMENTALS: AN INTRODUCTION TO ENGINEERING, 5e helps students develop the strong problem-solving skills and solid foundation in fundamental principles they will need to become analytical, detail-oriented, and creative engineers. The book opens with an overview of what engineers do, an inside glimpse of the various areas of specialization, and a straightforward look at what it takes to succeed. It then covers the basic physical concepts and laws that students will encounter on the job. Professional Profiles throughout the text highlight the work of practicing engineers from around the globe, tying in the fundamental principles and applying them to professional engineering. Using a flexible, modular format, the book demonstrates how engineers apply physical and chemical laws and principles, as well as mathematics, to design, test, and supervise the production of millions of parts, products, and services that people use every day. In this comprehensive guide to creating an e-commerce Web site using PHP and MySQL, renowned author Larry Ullman walks you through every step--designing the visual interface, creating the database,

presenting content, generating an online catalog, managing the shopping cart, handling the order and the payment process, and fulfilling the order—always with security and best practices emphasized along the way. Even if you're an experienced Web developer, you're guaranteed to learn something new. The book uses two e-commerce site examples—one based on selling physical products that require shipping and delayed payment, and another that sells non-physical products to be purchased and delivered instantly—so you see the widest possible range of e-commerce scenarios. In 11 engaging, easy-to-follow chapters, *Effortless E-Commerce with PHP and MySQL* teaches you how to:

- Think of the customer first, in order to maximize sales
- Create a safe server environment and database
- Use secure transactions and prevent common vulnerabilities
- Incorporate different payment gateways
- Design scalable sites that are easy to maintain
- Build administrative interfaces
- Extend both examples to match the needs of your own sites

Larry Ullman is the president of Digital Media and Communications Insights, Inc., a firm specializing in information technology ([www.dmcinsights.com](http://www.dmcinsights.com)). He is the author of several bestselling programming and Web development books, including *PHP and MySQL for Dynamic Web Sites: Visual QuickPro Guide*. Larry also writes articles on these subjects and teaches them in small and large group settings. Despite working with computers, programming languages, databases, and such since the early 1980s, Larry still claims he's not a computer geek (but he admits he can speak their language).
