The Middle Ages has had a poor reputation among twentieth-century psychologists. Edwin Boring, in *A History of Experimental Psychology* (New York, 1929), held that late medieval thinking was based largely on theology and hence tended to be opposed to science. Gregory Zilboorg, in his *History of Medical Psychology* (New York, 1941), claimed that medieval medical [...]

the discussion of the various types of disorder, while the essential features of DSM-IV are printed for ready reference on the endpapers of the volume. Numerous supplements are available to accompany the text. Annotation copyright by Book News, Inc., Portland, OR

A briefer version of the most authoritative and respected introductory text for the abnormal psychology course. This allows instructors who prefer less detail to still use a research-oriented text. As in their more comprehensive version, the esteemed author team of Jim Butcher, Sue Mineka and Jill Hooley offers students a thoroughly researched and up-to-date explanation of psychopathology, creating a learning experience that invokes thought, increases awareness, and takes students to levels of understanding that other books do not offer.

Case Studies in Abnormal Psychology presents a broad range of cases drawn from the clinical experience of authors Kenneth N. Levy, Kristen M. Kelly, and William J. Ray to take readers beyond theory into real-life situations. The authors take a holistic approach by including multiple perspectives and considerations, apart from those of just the patient. Each chapter follows a consistent format: Presenting Problems and Client Description; Diagnosis and Case Formulation; Course of Treatment; Outcome and Prognosis/Treatment Follow-up; and Discussion Questions. Providing empirically supported treatments and long-term follow-up in many case studies gives students a deeper understanding of each psychopathology and the effects of treatment over time.

offers balanced and clear coverage of psychopathology theories, research, and clinical implications. Fully updated to reflect DSM-5 and the newest scientific, psychological, multicultural and psychiatric research, the book introduces and integrates the Multipath Model of Mental Disorders to explain how four essential factors-biological, psychological, social, and sociocultural-interact to cause mental disorders. A focus on resilience highlights prevention and recovery from the symptoms of various disorders. This edition also continues its emphasis on the multicultural, sociocultural and diversity aspects of abnormal psychology. The authors present material in a lively and engaging manner, connecting topics to real-world case studies, current events, and issues of particular importance and relevance in today's world. Special features and the fresh design make the book even more approachable and appealing to all readers.
