synthesis of current work and research in media management and economics. The volume has been developed around two primary objectives: assessing the state of knowledge for the key topics in the media management and economics fields; and establishing the research agenda in these areas, ultimately pushing the field in new

directions. The Handbook's chapters are organized into parts addressing the theoretical components, key issues, analytical tools, and future directions for research. Each chapter offers the current state of theory and scholarship of a specific area of study, and the volume contributors--all well established in their

crime down the ages tells the history of human violence, from Peking Man to the Mafia (The Times, London). This landmark work offers a completely new approach to the history and psychology of human violence. Its sweep is broad, its research meticulous and detailed. Colin Wilson explores the bloodthirsty sadism of

the ancient Assyrians and the mass slaughter by the armies led by Genghis Khan, Tamerlane, Ivan the Terrible, and Vlad the Impaler. He delves into modern history, exploring the genocides practiced by Stalin and Hitler. He then takes a chilling look into the sex crimes and mass murders that have become symbols of the

The rise of American research universities to international preeminence constitutes one of the most important episodes in the history of higher education. Research and Relevant Knowledge follows Geiger's earlier volume on American research universities from 1900 to 1940. This second work is the first study to trace this

momentous development in the post-World War II period. It describes how the federal government first relied on university scientists during the war, and how the resulting relationship set the pattern for the postwar mushrooming of academic research. The first half of the book analyzes the development of the

postwar system of academic research, exploring the contributions of foundations, defense agencies, and universities. The second half depicts the rise of the "golden age" of academic research in the years after Sputnik (1957) and its eventual dissolution at the end of the 1960s graduate education. When the federal
