It is illustrated with over 500 photographs, diagrams and schematics. Chris Brady has written this book after many years developing the highly successful and informative Boeing 737 Technical Site, known throughout the world by pilots, trainers and engineers as the most authoritative open source of information freely available about the 737.

The Boeing 737-800 Study Guide is a compilation of notes taken primarily from flight manuals, but it also includes elements taken from class notes, computer-based training, and operational experience. It is intended for use by initial qualification crewmembers, and also for systems review prior to recurrent training or check rides. The book is written in a way that organizes in one location all the buzz words, acronyms, and numbers the average pilot needs to know in order to get through the events above from an aircraft systems standpoint.

737NG Training Syllabus is the descriptive title for this beautifully illustrated 383 plus page document. The highly detailed, full color book is virtually crammed with original graphics and thousands of words of descriptive text that will provide a complete training syllabus for persons wishing to learn to operate the 737NG jet airliner. While intended specifically for the Flight Simulation market, professional airline pilots will find the information useful and informative. This is a guide intended to teach "simmers" how to fly the jet the way "the Pros do".

This is the PERFECT companion for those X-Plane Flight Simulator pilots who love their IXEG 737. The material in the book is specifically written for this airplane ... and for those sim-pilots who want to know how to fly the 737-300 just like the pros.

the Boeing 737NG in special. It contains lots of colourful pictures and operational information for the airline pilot. "An excellent book which finally simplifies and brings together aircraft performance information." "It is the best performance book I ever held in my hands. Just brilliant!" "This book makes 737 performance transparent and understandable." "A must for every 737 pilot!"

Presents information on flight operations in aircraft with the latest "glass cockpit" advanced avionics systems, covering such topics as automated flight control, area navigation, weather data systems, and primary flight display failures.

Captain Mike Ray has put together a complete collection of just about everything a pilot needs to know to "Pass the Checkride". The document is profusely illustrated with a clearly understood visual and complete "training toolset" that will allow you to enter the simulator completely confident that you will at least look like you know what you are doing. The material is presented in an entertaining way that will keep your attention while providing a depth of understanding to the otherwise totally boring stuff you got from the company.
