Designed to be used in the classroom, at home or at work, the revolutionary BrailleNote Touch Plus will be your guide through your life journey! Say hello to the most powerful note taker!

Collaborative Assessment: Working with Students Who Are Blind or Visually Impaired, Including Those with Additional Disabilities. Stephen A. Goodman and Stuart H. Wittenstein, Editors Collaborative Assessment provides a framework for developing a cooperative, interactive team of professionals from a variety of disciplines to achieve an accurate evaluation of the needs and strengths of students who are visually impaired in every area, from vision to speech and language to technology. Itinerant Teaching: Tricks of the Trade for Teachers of Students with Visual Impairments, second edition. Jean E. Olmstead This classic guide to managing the fast-moving job of an itinerant teacher of visually impaired students is completely revised and updated, with new sections on young children, children with multiple disabilities, orientation and mobility, assistive technology, and stress management.

Simple, straightforward guidance for the practitioner who wants to use assistive technologies to extend library access. • Tutorials on technologies for individuals with disabilities arranged by disability category • 47 Microsoft Accessibility Options screenshots • Extensive bibliographies for each disability category and for universal access, training, and marketing • A glossary of assistive technology terms • Extensive resources for each disability category

Assistive Technology (AT) is the term used to describe products or technology-based services which support those with disabilities or other limitations to their daily activities, enabling them to enjoy a better quality of life. This book presents the proceedings of the 13th European Conference on the Advancement of Assistive Technology (AAATE 2015), held in Budapest, Hungary in September 2015. This biennial conference has established itself as a leading forum in the transdisciplinary area of Assistive Technology, providing a unique platform for the gathering of experts from around the world to review progress and challenges in the interdisciplinary fields which contribute to AT, such as research, development, manufacturing, supply, provision and policy. The theme of the 2015 conference is 'Attracting new areas and building bridges', and this book contains 138 reviewed papers and 28 poster presentations delivered at the conference, covering AT themes as diverse as aging, blindness, mobility, assisted living and accessibility for people with dementia and cognitive impairment. Offering a current overview of many aspects of AT, this book will be of interest to all those - from researchers and manufacturers to healthcare professionals and end-users - whose work or daily life involves the relationship between technology and disability.

Assistive technology has made it feasible for individuals with a wide range of impairments to engage in many activities, such as education and employment, in ways not previously possible. The key factor is to create consumer-driven technologies that solve the problems by addressing the needs of persons with visual impairments. Assistive Technology for Blindness and Low Vision explores a broad range of technologies that are improving the lives of these individuals. Presenting the current state of the art, this book emphasizes what can be learned from past successful products, as well as what exciting new solutions the future holds. Written by world-class leaders in their field, the chapters cover the physiological bases of vision loss and the fundamentals of orientation, mobility, and information access for blind and low vision individuals. They discuss technology for multiple applications (mobility, wayfinding, information access, education, work, entertainment), including both established technology and cutting-edge research. The book also examines computer and digital media access and the scientific basis for the theory and practice of sensory substitution. This volume provides a holistic view of the elements to consider when designing assistive technology for persons with visual impairment, keeping in mind the need for a user-driven approach to successfully design products that are easy to use, well priced, and fill a specific need. Written for a broad audience, this book provides a comprehensive overview and in-depth descriptions of current technology for designers, engineers, practitioners, rehabilitation professionals, and all readers interested in the challenges and promises of creating successful assistive technology.

THE INTRIGUING TITLE OF DIE DAILY CALLS FOR THE EXPLANATION THAT DIE IS AN ACRONYM FOR DREAM, IMPROVE, ENJOY. THE ELEVEN CHAPTER TITLES PROVIDE INSIGHT INTO THE SUBJECTS COVERED: WELCOME TO MY POETRY RIVER. I HOPE I DO DELIVER DAILY I DIE, THAT I DO TRY TO COMMUNICATE IS REALLY GREAT TAKE A WALK AND TRY SELF-TALK I DONT MIND BEING BLIND REFLECT, CONNECT, AND RESPECT LETS DELVE INTO THE TWELVE HUMOR OR RUMOR FROM MY PALS BOTH GUYS AND GALS OUR DANCE WITH ROMANCE I AM CAUGHT WITH A LITTLE AFTER-THOUGHT MOST OF THE 95 POEMS ARE PRECEDED BY AN EXPLANATION OR STORY WHICH ADDS MEANING, UNDERSTANDING, AND OFTEN HUMOR. WHEN YOU READ WHAT I HOPE IS FOR YOU A BUOYANT AND EXCITING BOOK, YOU WILL KNOW ME RATHER WELL. SAMPLE STANZAS FROM TWO SEPARATE POEMS FOLLOW: I START EACH AND EVERY DAY IN A POSITIVE AND JOYFUL WAY. EACH MORNING AS I THROW BACK THE SHEETS, THIS DAY IM EXUBERANT TO GREET! SO WHETHER YOURE YOUNG OR WHETHER YOURE OLD TAKE TIME TO DREAM AND LET LIFE UNFOLD. SET TIME ASIDE TO DREAM AND REST, DREAMS WILL FILL YOUR LIFE WITH ZEST.

Universal Usability: Past, Present, and Future surveys the state-of-the-art of human-computer interaction research into the design and development of interfaces that will be easy to use for users of all levels of technical experience ability. It also presents some future directions for work in this area.
