Architecture and Politics in Republican Rome is the first book to explore the intersection between Roman Republican building practices and politics (c 509-44 BCE). At the start of the period, architectural commissions were carefully controlled by the political system; by the end, buildings were so widely exploited and so rhetorically powerful that Cassius Dio cited abuse of visual culture among the reasons that propelled Julius Caesar's colleagues to murder him in order to safeguard the Republic. In an engaging and wide-ranging text, Penelope J. E. Davies traces the journey between these two points, as politicians developed strategies to manoeuver within the system's constraints. She also explores the urban development and image of Rome, setting out formal aspects of different types of architecture and technological advances such as the mastery of concrete. Elucidating a rich corpus of buildings that have been poorly understand, Davies demonstrates that Republican architecture was much more than a formal precursor to that of imperial Rome.

The original edition of Pompeii: A Sourcebook was a crucial resource for students of the site. Now updated to include material from Herculaneum, the neighbouring town also buried in the eruption of Vesuvius, Pompeii and Herculaneum: A Sourcebook allows readers to form a richer and more diverse picture of urban life on the Bay of Naples. Focusing upon inscriptions and ancient texts, it translates and sets into context a representative sample of the huge range of source material uncovered in these towns. From the labels on wine jars to scribbled insults, and from advertisements for gladiatorial contests to love poetry, the individual chapters explore the early history of Pompeii and Herculaneum, their destruction, leisure pursuits, politics, commerce, religion, the family and society. Information about Pompeii and Herculaneum from authors based in Rome is included, but the great majority of sources come from the cities themselves, written by their ordinary inhabitants – men and women, citizens and slaves. Incorporating the latest research and finds from the two cities and enhanced with more photographs, maps, and plans, Pompeii and Herculaneum: A Sourcebook offers an invaluable resource for anyone studying or visiting the sites.

Torelli's articles have been translated into English to form a unified treatment of the subject to provide a summa of recent work on a topic of major interest and relevance to all students and scholars of ancient Italy.

Reproduction of the original: Roman Society by Samuel Dill

This book brings together a vast amount of information pertaining to the society, economy, and culture of a province important to understanding the entire eastern part of the later Roman Empire. Focusing on Egypt from the accession of Diocletian in 284 to the middle of the fifth century, Roger Bagnall draws his evidence mainly from documentary and archaeological sources, including the papyri that have been published over the last thirty years.

Highly pictorial, these Eyewitness Travel Guides are now offered in a tenth anniversary edition, with all the information savvy travelers need to know.

This atlas presents technical information for professionals who process and use temperate or tropical timber. It combines the main technical characteristics of 283 tropical species and 17 species from temperate regions most commonly used in Europe with their primary uses.
