Handbook Edition 30

In the face of drought and desertification, well-designed, water harvesting earthworks such as swales, ponds, and dams are the most effective way

Access Free Caterpillar

to channel water into productive use. The result can be increased food production, higher groundwater levels, reduced irrigation needs, and enhanced ecosystem resilience. Yet, due to a lack of knowledge, designers, and landowners often build earthworks that

are costly,
inappropriately sized
and sited, or even
dangerous.>The
