Candace should've listened to her father. He warned her about gangster rappers and forbade her to go to Rilla's concert, but his strong guidance only fueled her defiance. Candace sneaked to the show anyway, and, at seventeen, she got the thrill of her life when Rilla invited her onstage for a special serenade. Candace gave herself to him that night and turned her back on everyone she knew when Rilla asked her to run away with him. Six months later Candace finds herself in Overbrook Meadows, Texas; a world away from the beautiful home and family she left behind in New York. Rilla has been dropped from his record label, and he's a fulltime dope man now. Candace's stomach is getting bigger, and she can't say for sure who the baby's father is. She thinks things are as bad as they can get, but she's wrong about that. Candace has not yet experienced the real pain her new life has in store.

Records the memories of a war in the words of those women courageous enough to walk into hell. San Francisco Chronicle A decade after America pulled out of Vietnam, the seeds of the often heart-wrenching oral history, *A Piece of My Heart*, were sown when writer and filmmaker Keith Walker met a woman who had been an emergency room nurse in Cu Chi and Da Nang. She and 25 others recount the time they spent "in country" as part of 15,000 American women who volunteered or served as nurses and in the military. NOTE: This edition does not include photographs. The emotional current never falters. The New York Times Book Review

This is a personal story of a boy from a small town in Illinois who manages to be the first person in his family to attend college (Northwestern), earn an officer's commission in the Navy, go on to be a tv news reporter in Tucson, Arizona, become a film script writer, then public relations executive first for a small California firm, then MGM, and later for several of Hollywood's top PR agencies, eventually forming his own firm, capping his career with nearly 35 years working for the Hyatt Foundation on their Pritzker Architecture Prize. All this, or most of it, in the closet, while in a sixty year relationship with another man.

This best-selling undergraduate textbook provides an introduction to key experimental techniques from across the biosciences. It uniquely integrates the theories and practices that drive the fields of biology and medicine, comprehensively covering both the methods students will encounter in lab classes and those that underpin recent advances and discoveries. Its problem-solving approach continues with worked examples that set a challenge and then show students how the challenge is met. New to this edition are case studies, for example, that illustrate the relevance of the principles and techniques to the diagnosis and treatment of individual patients. Coverage is expanded to include a section on stem cells, chapters on immunochemical techniques and spectroscopy techniques, and additional chapters on drug discovery and development, and clinical biochemistry. Experimental design and the statistical analysis of data are emphasised throughout to ensure students are equipped to successfully plan their own experiments and examine the results obtained.

This book, although targeting educational leaders, - teachers, school-based administrators, superintendents, board members, policy makers and education students, is also addressed to those interested in the topic of ethics and those who seek the development of an ethical awareness and an appropriate intellectual processes when facing ethical issues. In particular, the book uses both deductive and inductive methods to provide the reader with a progressive experience of ethical discernment and analysis in order to deal with and prepare the reader to

address ethical issues in the public square - a task which requires that such decisions are rational, defensible, and clearly articulated. Institutional leaders' diligence and integrity requires no less in attaining and sustaining the support of those they must lead in and through the institutional decisions and policies which effect constituents' lives. Through the use of clearly stated definitions, the presentation of ethical schools of thought, cases, original plays - within which readers are encouraged to engage while in a safe learning environment - and references to poems, movie, and video clips, the book provides a lively and challenging approach to studying the topic of ethics.

Eleven-year-old Jesse tries to find a way to free his new friend, a 7,000-pound killer whale named Willy, from a miserable existence as the star attraction at an amusement park.

Drawing on his groundbreaking work on intelligence and creativity, Harvard psychologist Howard Gardner, developer of the theory of Multiple Intelligences, offers fascinating revelations about the mind of the leader and his or her followers. He identifies six constant features of leadership as well as paradoxes that must be resolved for leadership to be effective using portraits of leaders from J. Robert Oppenheimer to Alfred P. Sloan, from Pope John XXIII to Mahatma Gandhi.

INSTANT NEW YORK TIMES BESTSELLER Two brothers meet in the remote Australian outback when the third brother is found dead, in this stunning new standalone novel from Jane Harper. Brothers Nathan and Bub Bright meet for the first time in months at the remote fence line separating their cattle ranches in the lonely outback. Their third brother, Cameron, lies dead at their feet. In an isolated belt of Australia, their homes a three-hour drive apart, the brothers were one another's nearest neighbors. Cameron was the middle child, the one who ran the family homestead. But something made him head out alone under the unrelenting sun. Nathan, Bub and Nathan's son return to Cameron's ranch and to those left behind by his passing: his wife, his daughters, and his mother, as well as their long-time employee and two recently hired seasonal workers. While they grieve Cameron's loss, suspicion starts to take hold, and Nathan is forced to examine secrets the family would rather leave in the past. Because if someone forced Cameron to his death, the isolation of the outback leaves few suspects. A powerful and brutal story of suspense set against a formidable landscape, *The Lost Man* confirms Jane Harper, author of *The Dry* and *Force of Nature*, is one of the best new voices in writing today.
