the women's leadership movement who shows women how to cultivate the single skill they really need in order to thrive: the ability to let go. Once the poster girl for doing it all, after she had her first child, Tiffany Dufu struggled to accomplish everything she thought she needed to in order to succeed. Like so many driven and talented women who have been brought up to believe that to have it all, they must do it all, Dufu began to feel that achieving her career and personal goals was an impossibility. Eventually, she discovered the solution: letting go. In *Drop the Ball*, Dufu recounts how she learned to reevaluate expectations, shrink her to-do list, and meaningfully engage the assistance of others—freeing the space she needed to flourish at work and to develop deeper, more meaningful relationships at home. Even though women are half the workforce, they still represent only eighteen per cent of the highest level leaders. The reasons are obvious: just as women reach middle management they are also starting families. Mounting responsibilities at work and home leave them with no bandwidth to do what will most lead to their success. Offering new perspective on why the women's leadership movement has stalled, and packed with actionable advice, Tiffany Dufu's *Drop the Ball* urges women to embrace imperfection, to expect less of themselves and more from others—only then can they focus on what they truly care about, devote the necessary energy to achieving their real goals, and create the type of rich, rewarding life we all desire.

Are we living the good life—and what defines 'good', anyway? Americans today are constructing a completely different framework for success than their parents' generation, using new metrics that TEDWomen speaker and columnist Courtney Martin has termed collectively the "New Better Off". The *New Better Off* puts a name to the American phenomenon of rejecting the traditional dream of a 9-to-5 job, home ownership, and a nuclear family structure—illuminating the alternate ways Americans are seeking happiness and success. Including commentary on recent changes in how we view work, customs and community, marriage, rituals, money, living arrangements, and spirituality, *The New Better Off* uses personal stories and social analysis to explore the trends shaping our country today. Martin covers growing topics such as freelancing,

collaborative consumption, communal living, and the breaking down of gender roles. The New Better Off is about the creative choices individuals are making in their vocational and personal lives, but it's also about the movements, formal and informal, that are coalescing around the New Better Off idea—people who are reinventing the social safety net and figuring out how to truly better their own communities.

"As the first agent to publicly betray the CIA, Philip Agee was on the run for over forty years--a pariah akin to Edward Snowden. Agee revealed in spectacular detail what many had feared about the CIA's actions, but he also outed and endangered hundreds of agents. Agee relentlessly opposed the CIA and the regimes it backed, whether in America or around the world. In Jonathan Stevenson's words, Agee became "one of history's successful viruses: undeniably effective and impossible to kill." In this first biography of Agee, Stevenson will reveal what made Agee tick, and what made him run"--

#1 NEW YORK TIMES BESTSELLER • Meghan, The Duchess of Sussex's first children's book, *The Bench*, beautifully captures the special relationship between father and son, as seen through a mother's eyes. The book's storytelling and illustration give us snapshots of shared moments that evoke a deep sense of warmth, connection, and compassion. This is your bench where you'll witness great joy. From here you will rest. See the growth of our boy. In *The Bench*, Meghan, The Duchess of Sussex, touchingly captures the evolving and expanding relationship between father and son and reminds us of the many ways that love can take shape and be expressed in a modern family. Evoking a deep sense of warmth, connection, and compassion, *The Bench* gives readers a window into shared and enduring moments between a diverse group of fathers and sons—moments of peace and reflection, trust and belief, discovery and learning, and lasting comfort. Working in watercolor for the first time, Caldecott-winning, bestselling illustrator Christian Robinson expands on his signature style to bring joy and softness to the pages, reflecting the beauty of a father's love through a mother's eyes. With a universal message, this thoughtful and heartwarming read-aloud is destined to be treasured by families for generations to come.

The critically acclaimed, award-winning, modern classic *Speak* is now a stunning graphic novel. "Speak up for yourself—we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless—an outcast—because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. Through her work on an art project, she is finally able to face what really happened that night: She was raped by an upperclassman, a guy who still attends

Merryweather and is still a threat to her. With powerful illustrations by Emily Carroll, Laurie Halse Anderson's *Speak: The Graphic Novel* comes alive for new audiences and fans of the classic novel. This title has Common Core connections.

In developing countries, traditional fermentation serves many purposes. It can improve the taste of an otherwise bland food, enhance the digestibility of a food that is difficult to assimilate, preserve food from degradation by noxious organisms, and increase nutritional value through the synthesis of essential amino acids and vitamins. Although "fermented food" has a vaguely distasteful ring, bread, wine, cheese, and yogurt are all familiar fermented foods. Less familiar are gari, ogi, idli, ugba, and other relatively unstudied but important foods in some African and Asian countries. This book reports on current research to improve the safety and nutrition of these foods through an elucidation of the microorganisms and mechanisms involved in their production. Also included are recommendations for needed research.
