An aesthetic, historical, and theoretical study of four scores, Russian Opera and the Symbolist Movement is a groundbreaking and imaginative treatment of the important yet neglected topic of Russian opera in the Silver Age. Spanning the gap between the supernatural Russian music of the nineteenth century and the compositions of Prokofiev and Stravinsky, this exceptionally insightful and well-researched book explores how Russian symbolist poets interpreted opera and prompted operatic innovation. Simon Morrison shows how these works, though stylistically and technically different, reveal the extent to which the operatic representation of the miraculous can be translated into its enactment. Morrison treats these largely unstudied pieces by canonical composers: Tchaikovsky's Queen of Spades, Rimsky-Korsakov's Legend of the Invisible City of Ktztzh and the Maiden Fevroniya, Scriabin's unfinished Mysterium, and Prokofiev's Fiery Angel. The chapters, revisionist studies of these composers and scores, address separate aspects of Symbolist poetics, discussing such topics as literary and musical decadence, pagan-Christian syncretism, theurgy, and life creation, or the portrayal of art in life. The appendix offers the first complete English-language translation of Scriabin's libretto for the Preparatory Act. Providing valuable insight into both the Symbolist enterprise and Russian musicology, this book casts new light on opera's evolving, ambiguous place in fin de siöcle culture.

Higher demands placed on the security, flexibility and convenience of electrical installations combined with the need to minimize energy requirements have led to the development of home and building management systems.The KNX technology is the result of the pooling of knowledge and experience gained over the last 25 years with the predecessor technologies to KNX, i.e. the European Installation Bus (EIB), the European Home System (EHS) and BatiBUS.The skillful application of KNX requires sound knowledge of all persons involved. Training measures are therefore required towards:" Selection of bus devices and installation material," fields of application and main applications of the KNX bus system," selection of the bus topology in view of the construction of the building and the desired functionalities," planning of the to be installed bus system;" Installation, thereby taking into account the relevant regulations (e.g. lightning protection, electromagnetic compatibility, etc.);" Commissioning and servicing of KNX installations.The January 2015 edition of the KNX Basic Course Documentation gives you an in-depth overview of all the above listed points. In-depth information about Security, HVAC control with KNX... can be found in the document "KNX Advanced Course Documentation" which is published separately.This Basic Course Documentation (with successful concluding exam) is the basis for KNX Partnership. Courses are organised by more than 300 certified training centres around the world.

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

He's a down-on-his-luck janitor with aspirations of writing the great American trash novel. She's the spoiled, sharp-tongued boss's daughter, always looking for a creative way to spice up her boring life. Normally, these two would never meet, but a higher power has different plans for both of them. The major motion picture from 20th Century Fox starring Ewan McGregor, Cameron Diaz and Holly Hunter hits the box office in October.
