European court strikes down EU-US Privacy Shield user data ...

Brought to you by WireWheel and the IAPP. How the EU's ePrivacy Regulation Can Influence Domestic Data Protection Laws. Broadcast date: July 14, 2020. Time: 8:00 – 9:00 a.m. PT, 11:00 a.m. – noon ET, 5:00 – 6:00 p.m. CET. The EU has typically been the front-runner when it comes to data privacy laws and best practices, certainly setting a high bar.

The rapid development of information technology has exacerbated the need for robust personal data protection, the right to which is safeguarded by both European Union (EU) and Council of Europe (CoE) instruments. Safeguarding this important right entails new and significant challenges as technological advances expand the frontiers of areas such as surveillance, communication interception and data storage. This handbook is designed to familiarise legal practitioners not specialised in data protection with this emerging area of the law. It provides an overview of the EU ' s and the CoE ' s applicable legal frameworks. It also explains key case law, summarising major rulings of both the Court of Justice of the European Union and the European Court of Human Rights. In addition, it presents hypothetical scenarios that serve as practical illustrations of the diverse issues encountered in this ever-evolving field.

An examination of corporate privacy management in the United States, Germany, Spain, France, and the United Kingdom, identifying international best practices and making policy recommendations. Barely a week goes by without a new privacy revelation or scandal. Whether by hackers or spy agencies or social networks, violations of our personal information have shaken entire industries, corroded

relations among nations, and bred distrust between democratic governments and their citizens. Polls reflect this concern, and show majorities for more, broader, and stricter regulation—to put more laws “on the books.” But there was scant evidence of how well tighter regulation actually worked “on the ground” in changing corporate (or government) behavior—until now. This intensive five-nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work, and what kinds of regulation effectively shape their behavior. And the research yields a surprising result. The countries with more ambiguous regulation—Germany and the United States—had the strongest corporate privacy management practices, despite very different cultural and legal environments. The more rule-bound countries—like France and Spain—trended instead toward compliance processes, not embedded privacy practices. At a crucial time, when Big Data and the Internet of Things are snowballing, *Privacy on the Ground* helpfully searches out the best practices by corporations, provides guidance to policymakers, and offers important lessons for everyone concerned with privacy, now and in the future.

Your ultimate guide to preparing for the CIPP/US exam - now with a new downloadable guide to the changes in the autumn 2021 CIPP objectives The IAPP CIPP / US Certified Information Privacy Professional Study Guide is your one-stop resource for complete coverage of the challenging CIPP/US exam.
