 By way of background to this last point, FIDIC produced a core ‘Rainbow Suite’ of 4 contracts in 1999: the Red Book (for Building and Engineering Works), the Yellow Book (Plant and Design-Build), the Silver Book (EPC/Turnkey Projects) and the Green Book (short form contract).

FIDIC | Construction Law  
 The New FIDIC 2017 Yellow Book was pre-released in draft form in December 2016. There has been plenty of concern expressed by contractor bodies from across the globe as to some of the proposed changes so whether all of them make it into the 2nd Edition is very much debatable.

The New FIDIC 2017 Yellow Book – what you need to know  
 The Yellow Book (the Plant and Design-Build Contract) is intended for use where the works are designed by the contractor. It is a lump sum contract, in which the contractor promises to deliver the project for a set price. The contractor, therefore, takes the risk of quantities.

New FIDIC yellow book 2017: major changes - Lexology  
 The latest offering by FIDIC at the end of last year is the first edition of the Yellow Book Conditions of Subcontract intended to accompany the FIDIC Conditions of Contract for Plant and Design-Build (1999 Yellow Book). In this webinar our FIDIC experts from around the world will guide you through the recent FIDIC subcontract developments.

The book analyses every aspect of the ease or otherwise of implementing the FIDIC Yellow Book Conditions of Contract. On a clause-by-clause basis, it highlights important structural features and suggests alternative text to avoid problems with the contract. Written in a user-friendly manner by an expert user of the FIDIC Suite of Contracts, who is a Member of the FIDIC President’s List of Adjudicators, this book will be a vital reference point for contractors, lawyers, engineers, arbitrators and all others concerned with the FIDIC contracts.

In September 1999, FIDIC introduced its new Suite of Contracts, which included a “new” Red, Yellow, Silver and Green forms of contract. The “new” Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: · background and concepts of the various forms of contract; · a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; · analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned; · a range of ‘decision tree’ charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; · a much enlarged discussion of the meaning of “claim” and “dispute” and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submittal of claims by a contractor and by an employer; · the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and · five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

The FIDIC Conditions of Contract for Construction and the Conditions of Contract for Plant and Design-Build (known as the 1999 Red Book and the 1999 Yellow Book) were first published in 1999 and have been used for a large number of contracts around the world. During 2005, FIDIC and the multilateral development banks

cooperated to publish the MDB Harmonised Conditions of Contract for Construction. This book is a revised and extended edition of the authors earlier guides.

Provides a clear and comprehensive guide to the 2017 FIDIC contracts—written by a member of the FIDIC Updates Task Group FIDIC contracts are the most widely used engineering standard form contracts internationally but until 2017 the three main forms (the Red, Yellow and Silver Books) had not been amended or updated for nearly two decades, since the first editions were published in 1999. Written by a specialist lawyer who was member of the FIDIC Updates Task Group responsible for writing the new contracts, this book examines in detail the many substantial changes they have introduced. After providing an overview the contracts are examined clause by clause with the aim of showing how each compares and contrasts with the others and how the second editions compare and contrast with the first. The first chapter describes how the Red, Yellow and Silver Books evolved from earlier contract forms and the distinctive characteristics of each, before providing an overview of the updates, including new potential risks for both Employer and Contractor, and then examining, in the second chapter, key general provisions such as the new rules on notices and limitation of liability. Chapter 3 examines the enhanced role of the Engineer in the Red and Yellow Books/Employer’s Representative’s function in the Silver including the new procedure for determinations as well as the Employer’s obligations and contract administration. The Contractor’s obligations are considered in chapter 4 while chapter 5 examines his responsibility for design in the Yellow and Silver Books. Chapters 6 to 14 deal respectively with plant, materials and workmanship and staff and labour; time-related provisions in the three contracts including extensions of time, and the Employer’s right to suspend the works; testing on and after completion and the Employer’s taking over of the works; defects after taking over, acceptance of the works and unfulfilled obligations; measurement (in the Red Book), the Contract Price and payment; the new variations regime and adjustments to the Price; termination and suspension; care of the works and indemnities and Exceptional Events (previously, Force Majeure). An important feature of the new contracts is their increased emphasis on clarity in the claims process and on dispute avoidance. These topics are examined in the final two chapters, 15 and 16, which deal respectively with the new claims and dispute resolution provisions of the 2017 forms. FIDIC contracts are the most widely used standard forms of contract for international engineering and construction projects Provides a clear and comprehensive guide to the 2017 FIDIC Red, Yellow and Silver Books Written by a senior specialist lawyer and member of the FIDIC 2017 Updates Task Group responsible for writing the new contracts Accessible to those with little or no familiarity with FIDIC contracts The 2017 FIDIC Contracts is an important guide for anyone engaged in international projects, including employers, contractors, engineers, lawyers, suppliers and project financiers/sponsors.

When all parties involved in the construction process fully understand their roles and are able to anticipate potential points of conflict, disputes and delays will be minimised. The Employer’s and Engineer’s Guide to the FIDIC Conditions of Contract sets out the essential administrative requirements of a FIDIC based contract by reference to the FIDIC 1999 Red Book. The obligations and duties of the Employer and the Engineer are identified and discussed. Potential pitfalls are highlighted and likely consequences pointed out. The importance of the Employer’s role in the preparation of tenders, which fully reflect his requirements and duties and obligations arising in the execution of the works, is emphasised. The key role of the Engineer in the effective administration of contracts after award is examined and commentary provided. Included in the guide are a number of appendices, including model letters which will be of value to less experienced staff (particularly those whose mother-tongue is not the English language). Engineers, quantity surveyors and project managers engaged in the contractual administration of international projects using FIDIC forms of contract will find the concise guidance in simple and jargon-free language provided here invaluable. This, together with the author’s earlier book, Contractor’s Guide to the FIDIC Conditions of Contract - which describes the duties, rights and responsibilities of the Contractor – represents the totality of supervision, design and execution of construction projects executed under the FIDIC Conditions of Contract. This book’s companion website offers invaluable resources to freely download, adapt and use: Model letters for use by the Employer Model letters for use by the Contractor Sample Interim Payment Certificate Model Form for Submissions to the Engineer Model Form of Engineer’s Order for Varied Works Model Form of Daywork/Daily Record Sheets

The terms of the Conditions of Contract for Design - Build and Turnkey have been prepared by the Federation Internationale des Ingenieurs Conseils (FIDIC) and are recommended for general use for the purpose of the design and construction of works where tenders are invited on an international basis; with minor modifications, the Conditions are also suitable for use on domestic contracts.

Written by a member of the FIDIC President’s List of Adjudicators, this detailed and critical commentary on the FIDIC Red Book provides authoritative guidance and recommendations for best practice. Focusing on each Clause of the Condition of Contract, this book identifies pitfalls and logistics issues associated with its enforcement and ancillary processes, to give readers an advantage when operating with the FIDIC Red Book. Intended to promote the best use and growth of FIDIC, this guide will be essential for all users of the FIDIC Red Book, be they contractors, lawyers, engineers, students training to join these industries or any professional involved in the resolution of disputes involving the FIDIC Red Book.

Dispute boards were first introduced almost 20 years ago. Since then close to \$100 billion US dollars worldwide has been spent on construction projects that have used dispute boards. Of these, 98% were constructed without any court battles and of the remaining 2%, the dispute board decisions were upheld by either arbitration and/or the court: a truly impressive record. Yet very little is known about what dispute boards are and how they operate. This book provides the knowledge necessary for those actively involved in dispute board work as well as for those who need to learn the process. Important features of the book include: analysis of the differences between dispute adjudication boards, dispute resolution boards and combined dispute boards in-depth discussion of both the existing and historical international case law on dispute boards, including its history under the British common law, European civil law and Muslim Shari’ah law analysis of the differences between the various major standard forms of dispute board rules – FIDIC, International Chamber of Commerce and DBFederation - along with sample wording to add to or modify these forms as needed. analysis of how referrals are made to dispute boards and sample forms. an in-depth discussion of the ethical requirements relating to dispute board members comparison of board selection techniques with guidelines for implementation and recommendations for the parties sample forms for use in establishing a dispute board discussion of site visits, how they should be conducted and sample forms general forms for use in operating a dispute board, form agendas, form reports and their use how to use a dispute board as a sounding board for grievances in depth discussion of how to write a decision or recommendation with examples of actual dispute board decisions and recommendations disclosure forms, questionnaires for potential board members, and comparison of board member agreements and sample forms a discussion of how to effectively use witnesses and the preparation and presentation of witness statements in dispute board hearings forms of notice and procedural rules governing the operation of dispute boards international case studies with claims, responses and decisions analysis of situations requiring the removal of dispute board members and form agreements for their removal discussion of the use of dispute boards in areas other than construction.
