Presents photographs of urban Vancouver taken during the 1950s and 1960s in color rather than the black-and-white hues used by other photographers at the time, along with essays that discuss his life and artistic style.
Nine years ago, bestselling author and business consultant Mark Sanborn introduced the world to Fred, his postman, who delivered extraordinary service in simple but remarkable ways. Fred’s story inspired millions. Companies—even, cities—were inspired to turn the ordinary into the extraordinary each day. Today, with stiff competition from the networked global economy, delivering extraordinary results is more important than ever. With Fred 2.0, Mark not only revisits the original Fred to gain new insights, but also equips all of us with new strategies to achieve more. You’ll not only be inspired by Fred 2.0, you’ll also have the tools and strategies to aim higher and achieve the extraordinary.

Texas legend has it that James Stephen Hogg, Governor of Texas from 1890 to 1894, named his daughters Ima and Ura, but that is only half-true: there never was a Ura. Ima had three brothers, Will, Mike, and Tom. Ima Hogg, who was born in 1882 and died in 1975 at age 93, became a legend in her own right, and this book is her story. It is also the story of the extraordinary bond between a father and a daughter. James Stephen Hogg, who worked his way from a hardscrabble life in the piney woods of East Texas to the Governor's Mansion in Austin, was a giant in Texas politics, both literally (standing six feet three inches tall and weighing close to 300 pounds) and figuratively, as the champion of the "little people" against big business in the 1890s. He adored his daughter, and after his wife, Sallie Stinson Hogg, died of tuberculosis in 1895, Ima and her father drew even closer. Jim Hogg, a widower in his 40's with four children--Will, 20; Ima, 13, Mike, 10, and Tom, 8--left politics to practice law in Austin, and Ima became the "sunshine" of her father's household. While Ima attended the University of Texas and then studied music in New York City, ex-Governor Hogg pursued business interests, and was one of the early investors in the Texas oil boom after the Spindletop gusher in 1901. He was not a rich man when he died in 1906, but the old plantation he bought in Brazos County near West Columbia would eventually produce oil that would make Ima and her brothers wealthy. The Hogg children lived well, but they also devoted part of their time and money to the enrichment of the educational and cultural life of Texas. Will gave generously to the University of Texas, his alma mater, and to many other institutions, such as the Museum of Fine Arts, Houston, and the Houston YMCA. "Miss Ima," as she was known (she never married), founded the Houston Symphony, served on the Houston School Board, established the Hogg Foundation for Mental Health, and restored several historic Texas buildings, including the house at the Varner-Hogg Historic Site, which had been her father's beloved country home. In 1966 she gave her own house, filled with the priceless Early American art and furniture she had collected, as the Bayou Bend Collection of the Museum of Fine Arts, Houston. Thousands of people visit Bayou Bend every year, and this book describes its history, as well as that of an extraordinary Texas woman. Ima Hogg: The Governor's Daughter is number 20 in the Fred Rider Cotten Popular History Series.

Argument for the incorporation of "Beverly Farms" to be separate from the town of Beverly in Essex County.
How do we fix the leaky educational pipeline into a conduit of success for Black males? That the issue is critical is demonstrated by the statistics that only 10% of Black males in the United States are proficient in 8th grade reading, only 52% graduate from high school within four years, and only 35 percent graduate from college. This book uniquely examines the trajectory of Black males through the educational pipeline from pre-school through college. In doing so it not only contributes significantly to the scholarship on the experiences of this population, but bridges the gap between theory and practice to provide frameworks and models that will improve these young men's educational outcomes throughout their educational journeys. A compelling feature of the book is that it does not treat Black males as homogeneous, but recognizes the diversity that exists among Black males in various educational settings. It demonstrates the need to recognize students' intersectionalities and individual characteristics as an essential preliminary to developing practices to improve outcomes at every educational stage. Throughout, the contributing authors also focus on the strategies and experiences of Black males who achieve academic excellence, examining growth-producing and asset-based practices that can be sustained, and that build upon the recognition that these males have agency and possess qualities such as resilience that are essential to their learning and development. The frameworks and models that conclude each chapter will commend this book as much to K-12 educators and administrators, and to higher education faculty, student affairs practitioners and administrators, as to policymakers for whom it provides template for rectifying the continuing inequities of our educational system.
