Have some fun Grab a can of shaving cream and a kid and go for it -- Sculpt in shaving cream -- Hold a seed spit -- Play Pretzel on a Pole and Chair-leg Ring Toss -- Make a mummy -- Go magnet fishing -- Play Cheek-rub Guess Make a crown of soap bubbles and a whipped cream mustache -- Paint everybody's feetFun To Grown On suggests 167 spontaneous, creative and playful ways to really connect with children. Using only the simplest props (whipping cream, a bag of cotton balls, building blocks, popcorn) these games delight kids and grown-ups as well. Adult participation is the key...nothing is so much fun as playing together. These play ideas are geared toward people rather than projects. They foster closeness and cooperation and facilitate interaction.

Teachers, parents, preschool and day-care providers, play group leaders, park district leaders, Sunday school teachers, and anyone who works with young children will love this book! Move! Imagine! Grow! is full of original, fun, engaging activities designed to get children moving, thinking creatively, and using their imaginations. It's a "think outside the box" resource with clear instructions for every activity. Skill development is clearly highlighted for each lesson, making it easy to tie in with your current lesson planning. Children will have so much fun they won't realize they're learning!Give children the gift of more movement and imaginative activity to stimulate their problem-solving skills and creativity. The activities in this book will expand their horizons, inspire their minds and even develop their vocabulary. They will ask for these activities over and over again!.

Presents the ASQ system with questionnaires in English. The Ages & Stages Questionnaires (ASQ) system is a low-cost, reliable way to screen infants and young children for developmental delays during the crucial first 5 years of life.

My Garden Journal, is an engaging companion tool for children starting a family garden. The kid-friendly activities are designed to motivate kids and inspire them to start (and keep) gardening. The book is formatted as a prompt journal and guides children through the various stages of gardening – from planning to harvesting. Starting a garden and caring for it is a wonderful way for kids to learn about the natural world around them. It provides numerous benefits and educational opportunities. The garden is a place of applied science, where children can observe first-hand many natural science concepts. The garden gives them practical experience of ideas that sometimes may seem abstract. And gardening is a great activity to keep children occupied during the no school summer months. This journal encourages kids to observe, record (through writing and drawing) and analyze the natural world around them. It offers ample space for kids to record their observations about the plants, the insects and animals that visit them, and the whole garden ecosystem. The book is divided into engaging sections and activities: Setting up and planning your garden; Includes activities to map out the garden, planting planning, and a glossary The plants: Individual pages with prompts to record information about each type of plant and to draw the plant and its flowers and fruits The insects and animals that visit the plants: Prompt pages where kids can record their observations about organisms in the garden, with questions about the role of these organisms and space to draw them Weekly chores: Space to list the garden chores for each week The seasons: Prompts to help the children observe seasonal changes in the garden and seasonal harvest yield activities Life cycles in the garden: Pages to allow kids to record the life stages of the types of organisms found in the garden - plants, insects, birds and mammals The garden ecosystem: Activities to get children to look at the garden as a whole web of life and the relationships among all the organisms in the garden Review your year in the garden: Questions and answers allow kids to reflect on what they have learned from their garden Future seasons in the garden: It takes several years for a garden to become well established. This section of the journal gives room for notes about the garden in the following years. Compact size fits easily into backpacks, but is big enough for small hands to comfortably write and draw.

Inspire your kids to pause their electronics and grow their social skills, through highly engaging, face-to-face conversations! In this book, you will discover:
* Why conversations matter and connecting with others is important.
* Three strategies to engage kids and keep the conversation going.
* Five tools to help children develop their social skills.
* How to use conversations to guide children toward positive change.
Then, dive into 131 creative, engaging, and fun conversations that will get your kids talking. This book is for children who desire to build face-to-face connections that develop into life-long friendships. It is also for parents, foster parents, teachers, coaches, youth pastors, mentors, and everyone who wants to help their kids to connect in an increasingly disconnected world! Conversation Starters Include:
* If the zoo offered to let you keep one exotic animal as a pet, which animal would you take home with you?
* If you were principal of your school for a day, what is one school rule that you would change?
* No two snowflakes are exactly alike. No two people are the same either. What is something that makes you unique?
Jed Jurchenko is passionate about supporting weary Christ-followers in leading their families, growing their friendships, and caffeinating their faith so that they can live joy-filled, Christ-honoring, lives. Jed is a husband, daddy to four girls, a marriage and family therapist, psychology professor, and an author. Jed and his wife, Jenny, blog at www.coffeeshopconversations.com

A fun and self-reflective book and bracelet kit which takes girls through ten elements of self-discovery and growth such as feelings, self-acceptance, empathy, decision making and communications. The theme of self-care is woven throughout the book in sections on sleep, healthy eating and stress management. The book comes with a kit to make a clever hemp, bead and charm bracelet.

You Are About To Discover A Completely New Yet Highly Practical And Effective Approach To Learning Italian! I know you've been working very hard to learn Italian and improve your understanding of this language or find the best way to get started in the best way possible. But do you know what the most difficult thing for any beginner Italian learner is? Finding the right material that is simple enough for them to stay motivated to follow through, and still informative and adequately comprehensive for them to accomplish their goals. And you know what? That's why this book is here! You may already know this but most tutorials focus so much on tough, expert-level concepts and methodology that do little to keep learners enthusiastic to keep reading and to some extent, even encouraging them to give up. Such books are never really interesting or entertaining, or useful enough for students to get value for their time and money. But this book changes everything. This book contains 13 entertaining stories that are both simple to read for someone who just begins learning Italian, while informative enough to spark and maintain positive progress in the Italian vocabulary and sentence construction. Are you wondering how different this book is? Whether it'll provide value as promised? Are you wondering whether it will teach you not just stories but grammar, vocabulary, slang, and rules that you can follow to become a better Italian speaker? Are you wondering how you will understand the book with all the Italian in it - whether it will be beginner-friendly? And much more? If so, you are in luck because this book will address all your concerns and more using simple, easy to follow language. Check out how the Italian Short Stories For Beginners is structured, and what it contains: You'll get different captivating stories, with each one having an important lesson of the essential tools that make up the language. These include verbs, tenses, adjectives, and common words and phrases to give directions -and so many more. They also have realistic dialogues and everyday situations that are sure to help you learn faster and better as you switch contexts. Worried about difficult words and slang? You don't have to worry about that here since at the end of each chapter, you'll get a definitive list of relevant vocabulary and slang as used in the stories and what they mean. You also get to view an English version of the Italian stories immediately after each to confirm your comprehension and compare the usage of the different tools in both versions of the stories. To further cement your understanding of the language are a set of strategic questions at the end of each chapter aimed at assessing how well you understood the stories. But don't worry if you're not a fan of quizzes because you'll find them very simple and helpful. ...And so much more! No matter how far and wide you search, you'd never find a guide as simple, informative, and as beginner-friendly as this one. So whether you are a complete beginner or already know some Italian and want to advance your knowledge of Italian, you will find this book handy! Grab your copy of the Italian Short Stories For Beginners to find out more, and improve your understanding of Italian in no time!

Greens Don't Grow In Cans is a children's book that teaches the origin and nutritional value of fresh fruits and vegetables. This book excites readers as they explore this colorful story, learning healthy vocabulary terms that grow with them. Greens Don't Grow In Cans encourages family participation in meal preparation and food education, with a fun and engaging approach.

Seeds can be big or small, round or pointy, and all sorts of colors. They can become flowers, trees, fruits, or vegetables, and they sprout all times of year, during spring, summer, fall, and winter. But all seeds have one thing in common--inside each is a new plant life waiting to emerge. What kind of plant will bloom? Wait and see what will grow! Including four gorgeous pull-out gatefolds, this lyrical and stunningly illustrated book includes fun facts about starting a garden.

Tools, interfaces, methods, and practices that can help bring about a healthy, socially inclusive, and sustainable food future. Our contemporary concerns about food range from food security to agricultural sustainability to getting dinner on the table for family and friends. This book investigates food issues as they intersect with participatory Internet culture—blogs, wikis, online photo- and video-sharing platforms, and social networks—in efforts to bring about a healthy, socially inclusive, and sustainable food future. Focusing on our urban environments provisioned with digital and network capacities, and drawing on such “bottom-up” sociotechnical trends as DIY and open source, the chapters describe engagements with food and technology that engender (re-)creative interactions. In the first section, “Eat,” contributors discuss technology-aided approaches to sustainable dining, including digital communication between farmers and urban consumers and a “telematic” dinner party at which guests are present electronically. The chapters in “Cook” describe, among other things, “smart” chopping boards that encourage mindful eating and a website that supports urban wild fruit foraging. Finally, “Grow” connects human-computer interaction with achieving a secure, safe, and ethical food supply, offering chapters on the use of interactive technologies in urban agriculture, efforts to trace the provenance of food with a “Fair Tracing” tool, and other projects. Contributors Joon Sang Baek, Pollie Barden, Eric P. S. Baumer, Eli Blevis, Nick Bryan-Kinns, Robert Comber, Jean Duruz, Katharina Frosch, Anne Galloway, Geri Gay, Jordan Geiger, Gijs Geleijnse, Nina Gros, Penny Hagen, Megan Halpern, Greg Hearn, Tad Hirsch, Jettie Hoonhout, Denise Kera, Vera Khovanskaya, Ann Light, Bernd Meerbeek, William Odum, Kenton O'Hara, Charles Spence, Mirjam Struppek, Esther Toet, Marc Tuters, Katharine S. Willis, David L. Wright, Grant Young
