Urban transport systems worldwide are faced by a multitude of challenges. Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world. The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars, with a limited number of cities improving public transport systems in a sustainable manner. However, a number of challenges faced by urban transport systems – such as greenhouse gas emissions, noise and air pollution and road traffic accidents – do not necessarily get solved by the construction of new infrastructure. Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap. The purpose of ‘transportation’ and ‘mobility’ is to gain access to destinations, activities, services and goods. Thus, access is the ultimate objective of transportation. As a result, urban planning and design should focus on how to bring people and places together, by creating cities that focus on accessibility, rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods. Urban form and the functionality of the city are therefore a major focus of this report, which highlights the importance of integrated land-use and transport planning. This new report of the United Nations Human Settlements Programme (UN-Habitat), the world’s leading authority on urban issues, provides some thought-provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems. The Global Report on Human Settlements is the most authoritative and up-to-date global assessment of human settlements conditions and trends. Preceding issues of the report have addressed such topics as Cities in a Globalizing World, The Challenge of Slums, Financing Urban Shelter, Enhancing Urban Safety and Security, Planning Sustainable Cities and Cities and Climate Change.

This book is an important volume in the series on the state-of-art research in Cartography and GI Science. It is a collection of selected peer-reviewed papers organized into contemporary topics of research, presented at the 27th International Cartographic Conference (ICC) in Rio de Janeiro. This is the 3rd edition of selected ICA conference papers published by Springer Lectures in Geoinformation and Cartography. The conference topic is “maps connecting the world,” and Brazilian cartographers and geo-information scientists are honored to welcome their peers from all over the world to the event, which will present some of the most important recent advances in cartography research and GI science. The most relevant papers will be selected for the Springer book and these will be organized into five sections according to topic area to provide a valuable cartography and GI science reference work

Silver medalist for the IPPY award for Current Events in 2016! Racial Realities and Post-Racial Dreams is a moral call, a harkening and quickening of the spirit, a demand for recognition for those whose voices are whispered. Julius Bailey straddles the fence of social-science research and philosophy, using empirical data and current affairs to direct his empathy-laced discourse. He turns his eye to President Obama and his critics, racism, income inequality, poverty, and xenophobia, guided by a prophetic thread that calls like-minded visionaries and progressives to action. The book is an honest look at the current state of our professed city on a hill and the destruction left on the darker sides of town.

Examines the rising power of China and Chinese foreign policy through a revisionist analysis of Chinese civilization. What does the rise of China represent, and how should the international community respond? With a holistic rereading of Chinese longue durée history, Fei-Ling Wang provides a simple but powerful framework for understanding the nature of persistent and rising Chinese power and its implications for the current global order. He argues that the Chinese ideation and tradition of political governance and world order—the China Order—is based on an imperial state of Confucian-Legalism as historically exemplified by the Qin-Han polity. Claiming a Mandate of Heaven to unify and govern the whole known world or tianxia (all under heaven), the China Order dominated Eastern Eurasia as a world empire for more than two millennia, until the late nineteenth century. Since 1949, the People’s Republic of China has been a reincarnated Qin-Han polity without the traditional China Order, finding itself stuck in the endless struggle against the current world order and the ever-changing Chinese society for its regime survival and security. Wang also offers new discoveries and assessments about the true golden eras of Chinese civilization, explains the great East-West divergence between China and Europe, and analyzes the China Dream that drives much of current Chinese foreign policy. “An original, important, well-researched, and powerfully argued exploration of the virtues and vices of the Chinese state from its ancient past to its likely future.” – Edward Friedman, University of Wisconsin, Madison “A masterpiece. Wang provides a grand, sweeping, even epic review of two thousand years of Chinese history. His argument is compelling and well documented; the richness and variety of sources—Chinese and English—he cites is breathtaking. The book is likely to end up on the reading list of every serious student of China’s position in the world for many years to come.” – Daniel C. Lynch, author of China’s Futures: PRC Elites Debate Economics, Politics, and Foreign Policy “This imaginative and provocative grand tour of Chinese cosmological order and geopolitical strategy, past and present, is destined to become a classic.” – Ming Xia, author of The People’s Congresses and Governance in China: Toward a Network Mode of Governance

GRADES 3-6: With age-appropriate activities, this beginning social studies workbook helps children build knowledge and skills for a solid foundation in map skills and geography. INCLUDES: This elementary workbook features easy-to-follow instructions and practice on key topics such as US geography, grid maps, US regions, global geography, North and South American geography, and more! ENGAGING: This geography and map workbook features colorful photographs and illustrations with fun, focused activities to entertain children while they grasp concepts and skills for success. HOMESCHOOL FRIENDLY: This elementary workbook for kids is a great learning resource for at home or in the classroom and allows parents to supplement their children’s learning in the areas they need it most. WHY CARSON DELLOSA: Founded by two teachers more than 40 years ago, Carson Dellosa believes that education is everywhere and is passionate about making products that inspire life’s learning moments.

The highly-respected book of reference of sought-after Independent Schools in membership of the Independent Schools Council’s Associations: HMC, GSA, The Society of Heads, IAPS, ISA and COBIS.

Sexuality and Gender at Home is the first book to explore the meanings and experiences of home through the framework of sexuality. Looking at a broad spectrum of sexuality, gender and domesticity, it examines the many ways in which home is constructed, performed and experienced in relation to sexuality and gender. Considering identity issues such as age, class, ethnicity and gender, the authors problematize intimacy and question conventional ways of thinking about allegedly ‘private’ home space. Comprehensive introductions to each of the book’s three sections – on Intimacy and Home, Queering Home, Beyond Home – provide a coherent overview of the existing literature as well as additional historical and cultural context. Fourteen chapters present ground-breaking research and insights into sexuality, gender and home across culture, time and space. Written by academics from a range of subject disciplines, chapters are based on research covering countries including Australia, France, Sweden, the UK, the USA, Guyana, Israel, and Singapore.This highly original text is the ideal starting point for anyone wishing to get to grips with the emerging field of sexuality, gender and home and will particularly appeal to researchers and students in anthropology, architecture, gender studies, sociology, and human geography.

Should we stay or should we go? Millions of parents with children in public schools can't believe they're asking this question. But they are. And you should be asking it too. Almost overnight, America's public schools have become morally toxic. And they are especially poisonous for the hearts and minds of children from religious families of every faith—ordinary families who value traditional morality and plain old common sense. Parents' first duty is to their children—to their intellect, their character, their souls. The facts on the ground point to one conclusion: get out now.
