manual handling | Search results | NICE

Manual handling is defined by current regulations as the transport or support of a load by hand or bodily force. This includes lifting, putting down, pushing, pulling, carrying, manoeuvring or transporting. Employers or employees that seriously breach manual handling regulations potentially face large fines and/or a custodial sentence.

Manual handling regulations: tip and advice | British ...

A manual task involves using your body to lift, lower, push, pull, carry or otherwise move, hold or restrain any person, animal or thing. Most jobs involve carrying out some type of manual tasks, but not all of them are hazardous. A manual task becomes hazardous when one or more of the following risk factors are present:

Online Library Guidelines Manual Handling

"This booklet is written for managers and supervisors in industries that involve the manual handling of containers. It offers suggestions to improve the handling of rectangular, square, and cylindrical containers, sacks, and bags. "Improving Manual Material Handling in Your Workplace" lists the benefits of improving your work tasks. It also contains information on risk factors, types of ergonomic improvements, and effective training and sets out a four-step proactive action plan. The plan helps you identify problems, set priorities, make changes, and follow up. Sections 1 and 2 of "Improvement Options" provide ways to improve lifting, lowering, filling, emptying, or carrying tasks by changing work practices and/or the use of equipment. Guidelines for safer work practices are also included. Section 3 of "Improvement Options" provides ideas for using equipment instead of manually handling individual containers. Guidelines for safer equipment use are also included. For more help the "Resources" section contains additional information on administrative improvements, work assessment tools and comprehensive analysis methods. This section also includes an improvement evaluation tool and a list of professional and trade organizations related to material handling."--Page 6.

Commonly used throughout the world, manual lifting tasks—whether simple or complex—all involve variable loads, postures, and movements. This practical guide discusses how to analyze the intricate lifting function and prevent injury during its execution. Outlining revised NIOSH Lifting Equation (RNLE) methods, the book illustrates their use in assessing manual lifting tasks of varying degrees of difficulty. Using examples to reinforce presented concepts, it explains how RNLE methods can be applied to evaluate single, composite, variable, and sequential lifting tasks. It also
