Hair Transplant 360: Volume 4 – Follicular Unit Extraction (FUE) is an illustrated guide to this minimally invasive procedure, involving the grafting of hair follicles that are genetically resistant to balding, onto a bald scalp. This book is edited by Samuel Lam, Director of the Lam Institute for Hair Restoration, Texas, and Kenneth L Williams from the Irvine Institute of Medicine and Cosmetic Surgery/Orange County Hair Restoration, California. The book is divided into 25 chapters across three sections. The first section covers the basics of FUE beginning with the history, terminology and physics of the technique. Other chapters include information on skin properties and anatomy, scalp anaesthesia, donor evaluation and surgical planning, and improving graft survival. Guidance on starting a practice in FUE is also included. The second part of the book covers FUE methods in detail, and the final section features discussion on specialised topics, such as regenerative medicine, complications and difficulties of FUE, and FUE from the beard and body. Hair Transplant 360: Volume 4 – Follicular Unit Extraction (FUE) contains 510 full colour photographs and illustrations, and includes four DVD ROMs demonstrating various FUE procedures in detail. Key Points

Comprehensive, illustrated guide to follicular unit extraction procedures Edited by renowned US experts in the field 510 full colour photographs and illustrations Includes four DVD ROMs demonstrating FUE procedures

This is a completely revised and expanded edition of Hair Transplant 360 for Physicians, Volume 1, edited by Samuel M Lam, Director of the Lam Institute for Hair Restoration Plano, Texas, featuring extensive discussion of bioenhancement technology. The book is divided into two parts: part one focuses on preoperative, operative and postoperative care. Chapter one features brand new and updated information on several therapies, and discussion on medical hair loss conditions. Chapter two includes completely revised guidance on operative technique, with a range of step-by-step techniques including hairline design, donor harvesting and recipient-site creation. The post-operative chapter includes discussion on creating standardised hair-transplant photography, leadership, office management and marketing. The second part of the book contains new case studies in hair transplantation, and a final chapter on physician training, which is demonstrated on a DVD-ROM. The DVD has been expanded and updated to cover hairline design using human models, donor harvesting, and recipient-site practice, making Hair Transplant 360 for Physicians, Volume 1 an ideal resource for hair transplant physicians in training. Key Points Revised and expanded second edition Previous edition published 2011 (9789350251782) 263 full colour images and illustrations DVD-ROM including step-by-step demonstrations for trainee physicians Edited by Samuel M Lam, Director, Lam Institute for Hair Restoration Plano, Texas, USA

Download Free Hair Transplant 360 Volume 4 By Samuel M Lam

The second edition of Hair Transplant 360: Volume 4 – Follicular Unit Extraction (FUE) is an illustrated guide to this minimally invasive procedure, involving the grafting of hair follicles that are genetically resistant to balding, onto a bald scalp. This book is edited by Samuel M Lam, from the Lam Institute for Hair Restoration, Texas, and Kenneth L Williams Jr from Orange County Hair Restoration, California. With the advent of hybrid-punch technology for follicular unit excision (FUE) in 2017, the first edition of this book became outdated and required a major revision. The new edition more than doubles the scope of the prior edition from 25 chapters in a single book, to 60 chapters in two hardcover volumes. The first volume updates and expands on the previous edition ' s sections and is divided into the following: Basics, Operative Fundamentals, Practice Considerations, and Devices. The second volume is entirely new and is sectioned into Concepts, Techniques, Adjunctive Measures, Regional and Ethnic, Complications and Repair, and How I Do It and Special Topics. This unique, comprehensive text provides practical, up to date knowledge on FUE and incorporates over 100 videos that cover a range of subjects showcasing operative technique, interviews, video lectures and much more, all easily accessed via a QR code embedded in each chapter. In addition, an app allows the video/photo/illustration/text experience to be completely portable with a tablet or phone.

Hair Transplant 360 is conceived as an entirely new project idea in which the physicians and the assistants have each been afforded an equally, authoritative voice. Volume 1 is written by

Download Free Hair Transplant 360 Volume 4 By Samuel M Lam

a physician for physicians. Understanding when it is safe and beneficial to operate and when to forgo the procedure (medical hair loss conditions, the dilemma of the young patient, scarring alopecia, etc.). Understanding male-pattern baldness and female-pattern baldness. Medical management of hair loss. Hairline design (principles, artistic, ethnic and gender variations; step-by-step technique). Donor harvesting (determining area for harvest, understanding and using different harvest techniques, when to perform a trichophytic closure; step-by-step technique). Recipient-site creation (basic principles: angles and distribution; regional considerations: hairline, female hairline, central forelock, midscalp, temple, lateral hump and crown; step-by-step technique for both single follicular-unit grafting and multiple follicular-unit grafting). Postoperative care, identifying and managing complications. Creating standardized hair-transplant photography. Leadership, office management and marketing. Quality control algorithm for the physician. Case studies, emphasizing creative approach to hair restoration.

Hair Transplant 360 is conceived as an entirely new project idea in which the physicians and the assistants have each been afforded an equally, authoritative voice. Volume 2 is written by an assistant for assistants. Phase 1 training (how to train a new assistant and determine whether that individual will perform well using a new “ foam model ” technique developed by the author). Phase 2 training (how to train an assistant using live tissue after completion of phase 1 training developed by the author). Review of anatomy, physiology and surgery basics for the assistant. Graft preparation: Slivering and graft dissection (step-by-step approach). Managing difficult graft preparation situations: white hair, ethnic hair, scar tissue, etc. Graft

Download Free Hair Transplant 360 Volume 4 By Samuel M Lam

placement technique and strategies (step-by-step approach). Understanding regional hair transplant principles (appropriate follicular unit selection and distribution according to their size, hair color and hair characteristics). Understanding the importance of hair curl. Managing difficult graft placement situations: popping, bleeding and oozing. Quality control for the assistant. Office set-up, photography basics, surgery room set-up and take down. Body ergonomics, stress management, team work.

Provides latest advances in hair transplantation. Extensive internationally recognised author team. Includes DVDs demonstrating procedures.

Hair Transplantation is a fully illustrated reference book that provides a state-of-the-art overview to all aspects of hair transplantation. Using a combination of written text, color photographs, and tables, eleven leading physicians and practitioners in the field discuss the latest surgical procedures to restore a natural-looking frame of hair to the face. This volume is an indispensable reference for dermatologists, practitioners, and residents, providing an extensive coverage of the latest procedures and instruments in hair restoration surgery, techniques for follicular unit extraction, Cicatricial alopecia, and eyelash transplantation.

This book comprehensively discusses the practical aspects of hair transplantation in Asians. The demand for hair transplantation has increased globally in recent years and Follicular Unit Extraction (FUE) is gaining popularity. As such the book examines the techniques used by different ethnic group in Asia, included shaving, non-shaving FUE and robotic hair restoration

Download Free Hair Transplant 360 Volume 4 By Samuel M Lam

surgery. With the help of illustrations, it describes surgical techniques and provides numerous practical tips. Written by leading experts and offering an overview of the current state of the art of hair restoration surgery, it enables experienced surgeons in the field to achieve optimal outcomes and to improve patients' QOL. It is a must read for hair surgeons performing hair transplantation on members of the Asian population.

Provides latest advances and techniques in aesthetic and reconstructive hair transplant surgery. Covers various procedures in step by step format and setting up a hair transplant practice.
