When nomad artist and free spirit Dan Price began jotting down his musings in the form of whimsical drawings and inspired prose, he hardly could have imagined that his self-published journal-zine, the *MOONLIGHT CHRONICLES*, would earn him a cult following across the country. Now in its twentieth edition, the *MOONLIGHT CHRONICLES* has brought Dan's creed of "truth, beauty, and really big sabbaticals from the convention of life" to thousands across the country. With such a following, Dan figured it was time to collect his offbeat observations into book form in hopes of inspiring other would-be journal writers to take pen, camera, and brush in hand. As Dan is fond of noting "Seems there's tons of empty journal books, but not too many on how to fill 'em up!" In *HOW TO MAKE A JOURNAL*, Dan answers the call, teaching readers how to tap into those pent-up creative juices and collect their life experiences on paper.

Kids love to personalize their own book and tell their stories. This is a journal with 12 creative writing prompts. Each prompt has a full page frame to draw a picture, and 3 full pages of elementary handwriting lines so your child can really tell their story. In the end they will have a unique book that's written entirely by them. Write their name in the cloud on the cover and it's their very own "published" book. Some of the prompts... Imagine what would happen if you and a friend dug a huge hole and did not stop digging for a year... One day I flew to the moon and this is a strange thing I found there... I was looking around my house and discovered a magic button, so I pushed it... This book was created for a 2nd grade classroom and would be great for homeschooling as well.

One of the key tasks every researcher must perform is publishing their work, and most of this publication will occur in peer-reviewed journals. These publications are essential for promotion, recognition, and creating a dialogue with your colleagues around the world. Unfortunately, writing publication-quality manuscripts and guiding them through the peer-review process is a difficult, time-consuming, and often frustrating task. In this book, I'll teach you how to make the process easier based on what I've learned from more than 25 years of helping authors publish more than 6000 papers in some of the world's most prestigious journals (including Nature, Science, and PNAS). Writing for Science Journals explains the details of every section of a journal manuscript, including tips and tricks you won't find elsewhere about how to deal with the peculiar ways that journals work with authors and reviewers. I'll also deal with some of the implications of statistics and experimental design that you may have learned in school, but possibly not in an integrated form that guides you through the steps necessary to perform publishable research. In each chapter, I'll provide a list of key points that you can use as the basis for developing a learning plan. I've also provided links to relevant online resources via a Links page that is available only to purchasers of the book, and an errata and additions page (see below) that will provide a forum for expanding on the book until the 2nd edition is available.
