I'll Carry the Fork! Recovering a Life After Brain Injury ...

The tests didn't hurt at all. Well, maybe one, but I'll get to that later. They were a little scary, sure. Any time you inject dye into a person's brain to monitor its activity, I think a little sweaty-palmsness is only natural. I was scheduled for a CT scan of the brain, an MRI of the brain and one of the cervical spine.

Ill Carry The Fork Recovering A Life After Brain Surgery

Written with laugh-out-loud humor, candor, and technical input from medical and legal professionals, I'll Carry the Fork! offers inspiration and practical help to anyone dealing with the aftermath of brain injury. Because, as Kara says, "Sometimes when your life ends, you don't actually die."

I'll Carry the Fork! Recovering a Life After Brain Injury ...

Kara Swanson is the author of I'll Carry the Fork! Recovering a Life After Brain Injury. Her book, her keynote speeches, and her Online blog have helped TBI survivors, their support people, and the medical community all over the globe. Now Kara returns for a 20th-anniversary encore to the original.

This is the long-awaited 3rd Edition!! Long an industry standard, "I'll Carry the Fork! Recovering a Life After Brain Injury," has helped countless survivors, loved ones and professionals in the traumatic brain injury/stroke community. Kara Swanson's journey is one to learn from, to cheer and, even, to laugh with along the way. Her honesty and willingness to share her struggles and triumphs have been changing the lives of survivors and their loved ones for more than 20 years. This book has been named a suggested and must-read resource for survivors and professionals in every rehab and neurological field, and even in college TBI-related studies. It has been translated into Japanese and Kara has made her book available on Kindle and in an audio format. Her accompanying speeches and award-winning blog have circled the globe. This book enlightens with vital information from TBI professionals in medical, rehab and legal arenas. Kara's book is a wonderful inspiration and, with each edition, she has continued to mold it to help those in the TBI community. This new edition is brighter and cleaner. Kara has inserted more blank pages for notes and she has reduced the price so that more survivors can obtain all of the wonderful input from professionals throughout the book. The audio version of this book was completed by the author in order to offer a pace and cadence for those survivors struggling with audio processing speed and/or challenged by the written word.

Kara Swanson is the author of, "I'll Carry the Fork! Recovering a Life After Brain Injury." Her book, her keynote speeches and her on-line blog have helped TBI survivors, their support people and the medical community all over the globe. Now Kara returns for a 20th-anniversary encore to the original. Incorporating the struggles and the successful strategies of the countless thousands she has met and worked with these last twenty years, Kara has created a unique and extraordinary compliment to the original. Written in her easy-to-understand, humorous and thought-provoking style, Kara shares an insight and wisdom that will continue to assist survivors, their families and the medical community. This anniversary "chapter" is almost book-length and packed with the vital issues so many survivors and their families face: measuring loss, recovery challenges, intimacy and relationships, successfully returning to work, developing coping skills, eliminating diminishing labels and more. Her message is invigorating and powerful. Splashed with her well-known humor and conversational style, this 20th-anniversary return is a triumph!

Head Cases takes us into the dark side of the brain in an astonishing sequence of stories, at once true and strange, from the world of brain damage. Michael Paul Mason is one of an elite group of experts who coordinate care in the complicated aftermath of tragic injuries that can last a lifetime. On the road with Mason, we encounter survivors of brain injuries as they struggle to map and make sense of the new worlds they inhabit. Underlying each of these survivors' stories is an exploration of the brain and its mysteries. When injured, the brain must figure out how to heal itself, reorganizing its physiology in order to do the job. Mason gives us a series of vivid glimpses into brain science, the last frontier of medicine, and we come away in awe of the miracles of the brain's workings and astonished at the fragility of the brain and the sense of self, life, and order that resides there. Head Cases "[achieves] through sympathy and curiosity insight like that which pulses through genuine literature" (The New York Sun); it is at once illuminating and deeply affecting.

Lost in My Mind is a stunning memoir describing Kelly Bouldin Darmofal's journey from adolescent girl to special education teacher, wife and mother -- despite severe Traumatic Brain Injury (TBI). Spanning three decades, Kelly's journey is unique in its focus on TBI education in America (or lack thereof). Kelly also abridges her mother's journals to describe forgotten experiences. She continues the narrative in her own humorous, poetic voice, describing a victim's relentless search for success, love, and acceptance -- while combating bureaucratic red tape, aphasia, bilateral hand impairment, and loss of memory. Readers will: Learn why TBI is a "silent illness" for students as well as soldiers and athletes. Discover coping strategies which enable TBI survivors to hope and achieve. Experience what it's like to be a caregiver for someone with TBI. Realize that the majority of teachers are sadly unprepared to teach victims of TBI. Find out how relearning ordinary tasks, like walking, writing, and driving require intense determination. "This peek into the real-life trials and triumphs of a young woman who survives a horrific car crash and struggles to regain academic excellence and meaningful social relationships is a worthwhile read for anyone who needs information, inspiration or escape from the isolation so common after traumatic brain injury." -- Susan H. Connors, President/CEO, Brain Injury Association of America "Kelly Bouldin Darmofal's account is unique, yet widely applicable: she teaches any who have suffered TBI—and all who love, care for, and teach them--insights that are not only novel but revolutionary. The book is not simply worth reading; it is necessary reading for patients, poets, professors, preachers, and teachers." -- Dr. Frank Balch Wood, Professor Emeritus of Neurology-Neuropsychology, Wake Forest School of Medicine Learn more at www.ImLostInMyMind.com From the Reflections of America Series at Modern History Press www.ModernHistoryPress.com

This second edition updates the 1983 work (" a gem " —Booklist) with a wealth of new information. The author, a therapist and recovered anorexic, draws upon her own experience and extensive research to produce a comprehensive account of the symptoms, causes and treatments of anorexia nervosa. She illuminates the anorexic ' s paradox—self-annihilation in service of self-preservation—and the central task of recovery: development of a Self. The author addresses the origins and attributes of anorexia and accompanying disorders, the use and misuse of the Internet, and the concept of recovery. She addresses different therapies in detail, as well as therapies for families and interventions. A directory of organizations, a list of resources for information and referral, a bibliography and index are included.

Humorist Cathy Crimmins has written a deeply personal, wrenching, and often hilarious account of the effects of traumatic brain injury, not only on the victim, in this case her husband, but on the family. When her husband Alan is injured in a speedboat accident, Cathy Crimmins reluctantly assumes the role of caregiver and learns to cope with the person he has become. No longer the man who loved obscure Japanese cinema and wry humor, Crimmins' husband has emerged from the accident a childlike and unpredictable replica of his former self with a short attention span and a penchant for inane cartoons. Where Is the Mango Princess? is a

breathtaking account that explores the very nature of personality-and the complexities of the heart. Outstanding Book Award Winner from the American Society of Journalists and Authors

A practical guide to letting go of the character defects that get in the way of true and joyful recovery. Resentment. Fear. Self-Pity. Intolerance. Anger. As Bill P. explains, these are the "rocks" that can sink recovery- or at the least, block further progress. Based on the principles behind Steps Six and Seven, *Drop the Rock* combines personal stories, practical advice, and powerful insights to help readers move forward in recovery. The second edition features additional stories and a reference section.

Berit has spent more than twenty years of her adult life hiding the dark secret she shares with her father. Now, when his health is failing, Berit, ready or not, must summon the courage to face him and settle their past before it's too late. She embarks on a journey home to close the door on decades of anger, confusion and shame. As one door closes, she cannot imagine what waits behind the one that's cracking open. Ten days will change everything and everyone. .A little history, mystery, humor, romance, sex, and family drama. Great for the plane ride or the vacation read! Not suitable for children. Mature themes, adult language, smoking, sexual content.

In the tradition of *Lorenzo's Oil*, a brutally searing story of one mother's quest to save her child's life. One day Kelly Crimmins was a happy seemingly healthy twelve-year-old; the next she confessed to her mom that she'd had blood in her urine for months. After a series of tests, Kelly was diagnosed with a life-threatening, potentially terminal autoimmune disease. *A Mother's Nightmare* details Cathy and Kelly's three-year medical and emotional journey, which took them from Philadelphia to Minnesota's Mayo Clinic and back again. Cathy writes about the toll taken on a young girl who suddenly becomes a patient, and about a mom who in fighting for her little girl's life becomes sick herself with worry and fear. As she did in her award-winning *Where Is the Mango Princess?*, Cathy makes illness both personal and universal. It's an account all readers will find memorable and moving.

The dramatic story of one man ' s recovery offers new hope to those suffering from concussions and other brain traumas In 1999, Clark Elliott suffered a concussion when his car was rear-ended. Overnight his life changed from that of a rising professor with a research career in artificial intelligence to a humbled man struggling to get through a single day. At times he couldn ' t walk across a room, or even name his five children. Doctors told him he would never fully recover. After eight years, the cognitive demands of his job, and of being a single parent, finally became more than he could manage. As a result of one final effort to recover, he crossed paths with two brilliant Chicago-area research-clinicians—one an optometrist emphasizing neurodevelopmental techniques, the other a cognitive psychologist—working on the leading edge of brain plasticity. Within weeks the ghost of who he had been started to re-emerge. Remarkably, Elliott kept detailed notes throughout his experience, from the moment of impact to the final stages of his recovery, astounding documentation that is the basis of this fascinating book. *The Ghost in My Brain* gives hope to the millions who suffer from head injuries each year, and provides a unique and informative window into the world ' s most complex computational device: the human brain.
