Wednesday, 01 September 2010. A review of Last Orders: The Essential Guide to your Letter of Wishes by Patricia C Byron, published in 2010 by Stellar Books. Last Orders is a book with a difference, and not what I expected when I was asked to conduct this review, which just goes to show you shouldn't judge a book either by its cover or its title. This is not to say that I was disappointed, in fact, quite the reverse.

In the twenty-first century, public health is everyone's business. The nursing and medical professions are well placed to provide advice to their clients, especially in respect to lifestyle change, and public health initiatives are supported by a range of statutory and voluntary organisations and health workers, ranging from health promotion specialists to smoking cessation advisers and nutrition assistants. Designed to help readers develop the practical skills they need to become effective public health practitioners, this concise text gives an easily digested overview of public health and health promotion theory in accessible language and diagrams, before moving on to the ways readers can apply this in practice. Providing an opportunity for practitioners to understand possible barriers to lifestyle change, debate health inequalities and responsibilities, and explore the role of the media in changing attitudes, it: Outlines the roles of specific organisations involved in the work of public health work. Covers health needs assessment, agenda setting and the technical aspects of how to research plan and evaluate effective practice either with individual clients or when devising programmes and initiatives for population groups. Details methods of helping people with motivation for lifestyle change, building rapport, ongoing support, monitoring and signposting to specific services. Discusses role of neighbourhoods and communities in improving health and how workers may support local populations to improve the health of their community. The Essential Guide to Public Health and Health Promotion is an accessible introduction to the principles and practice of health promotion and public health for all those new to working or studying in the area, whatever their professional background.

This is a book intended to assist anyone and everyone. It deals with that perennial taboo, the subject of death. It is not a will, nor should it be considered as such. It is however, the essential guide to producing your Letter of Wishes and which, once completed correctly, should save incalculable amounts of stress to those you leave behind and take most, if not all, of the guesswork out of the administration of an estate. It will offer a vast amount of helpful information about whom your executors should contact, the funeral you would wish for, your finances, your belongings, and even your pets. This book is simple yet comprehensive. Its usefulness cannot be overstated. You may not feel you need such a book, but consider this scenario: Imagine your child, sibling, or friend is executor to your will. When the sad time comes to wind up your estate, where would they start? Would they be able, for example, to answer the following questions: Who do you wish to have informed of your passing? Is there a family cemetery plot and where is the paperwork to support that? Where are the deeds to your house? Where is your will? Have you registered as an organ donor? Who has spare sets of keys to your house? Who knows the code to your burglar alarm? Or does your home have a safe? Who is to take care of your pet poodle Pandora? Equally important, who do you not want to take care of Pandora??? There are over 100 simple, but pertinent questions which need to be answered by you in Last Orders. Those answers will eradicate doubt and offer clarity to the executors of your will and those you leave behind. In researching Last Orders, Patricia C Byron consulted with solicitors, funeral directors, the Society of Trust & Estate Practitioners, The Law Society, MENCAP, but perhaps most telling of all, is that she has personal knowledge and experience of administering estates. Since its launch in the Spring of 2010, and following the author being interviewed on the BBC's Radio 4 Woman's Hour, Last Orders sold out and went to reprint. It has since become a staple item for those wishing to put their affairs in order. Along with the general public, there are now law firms within the UK Legal 500 using Last Orders for their Will-making clients as well as members of the Society of Trusts and Estate Practitioners, estate planners and independent financial advisors.

This comprehensive yet concise textbook is the first to provide a focused, subject specific guide to planning practice and law. Giving students essential background and contextual information to planning's statutory basis, the information is supported by practical and applied discussion to help students understand planning in the real world. The book is written in an accessible style, enabling students with little or no planning law knowledge to engage in the subject and develop the necessary level of understanding required for both professionally accredited and non-accredited courses in built environment subjects. The book will be of value to students on a range of built environment courses, particularly urban planning, architecture, environmental management and property-related programmes, as well as law and practice-orientated modules.

Four men gather in a London pub. They have taken it upon themselves to carry out the last orders of Jack Dodds, master butcher, and deliver his ashes to the sea. As they drive towards the fulfillment of their mission, their errand becomes an extraordinary journey into their collective and individual pasts. Braiding these men's voices, and that of Jack's widow, into a choir of sorrow and resentment, passion and regret, Swift
