The NBME Clinical Mastery Series is basically a web-based application which helps to support the US and overseas medical students an opportunity to prepare a self-assessment of clinical knowledge learned during medical institutions or clinical clerkship programs in the United States. The NBME Clinical Mastery Series conclude following areas:

score on NBME self assessments for clerkships. I took an NBME self assessment for my 3rd year clerkship to see where I am before my real deal shelf; I got a score of 17 on the "Self-Assessment Score," which is approximated as a 62 for the "Approximate Subject Examination Score." What I want to know is how to determine my percentile from the aforementioned scores I mentioned because my school uses percentiles to calculate grades.

familiarity with NBME-style questions. The Comprehensive Clinical Medicine Science Self-Assessment can be used to prepare for the multiple-choice component USMLE Step 3.

Blueprints Neurology provides students with a complete review of the key topics and concepts—perfect for clerkship rotations and the USMLE. The fourth edition includes new diagnostic and treatment information, an updated appendix of evidence-based resources, and a question bank at the end of the book.

Prepare Early...Score Higher Completely revised and small enough to fit in a lab coat pocket, Neurology: PreTest Self Assessment and Review, 5/e features 500 questions, including 200 new in clinical vignette format, with answers and explanations. All questions are reviewed by recent USMLE Step 2 test-takers.

Get the most comprehensive, up-to-date guidance available for exam prep with help from Neurology Self-Assessment. Written by Drs. Justin T. Jordan, David R. Mayans, and Michael J. Soileau, this companion volume to Bradley 's Neurology in Clinical Practice thoroughly covers the core and subspecialty topics you ' ll encounter on your exam, along with detailed answer explanations and cross-references to Bradley ' s. With a focus on assessing subspecialty strengths and weaknesses, it ' s the ideal preparation for board certification, maintenance of certification, in-training examinations, and neurology examinations for medical students. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Features six examinations of more than 100 questions each that follow the board exam blueprint. Contains challenging questions that fully prepare you for exams, with detailed answer explanations and references to Bradley ' s Neurology in Clinical Practice, 7th Edition. Covers basic neuroscience, behavioral neurology, and psychiatry; clinical neurology topics such as headache, cerebrovascular disease, and neuro-infectious disease; and increasingly tested areas such as ethics and interpersonal skills. Over a quarter of the questions include illustrations such as anatomy, imaging, histology slides, and clinical photos. Includes excellent coverage of key topics such as neurochemistry and neurophysiology, new immune-mediated therapies, child neurology, metabolic diseases, and much more. Offers unique, scorable tests online with subspecialty question divisions.

Since 1975, when the University of Oklahoma faculty created their review course for second-year medical students, the Oklahoma Notes have been among the most trusted and widely used reviews for the National Boards. Each Oklahoma Notes book presents the core information of one segment of the medical school curriculum. Written by some of the most effective medical educators in the country, the Oklahoma Notes feature: Concise text presented in outline format for rapid review; contents oriented to promote Boards success; self-assessment questions geared to the current format of the NBME exam; more tables and figures designed to facilitate self-assessment and review; and low-cost, complete coverage of each subject. Family Medicine joins the other clinical sciences already covered: General Surgery, Internal Medicine, Neurology and Clinical Neuroscience, Pediatrics, and Psychiatry.

Physicians who passed the neurology boards reveal what it takes to excel First Aid for the Neurology Boards is a unique high-yield guide for success on the Neurology Boards, in-training exams, and recertification. Readers will find hundreds of frequently tested facts based on feedback from test takers who just passed the exam, along with mini-cases that are essential for board preparation. Unlike similar reviews, First Aid for the Neurology Boards covers must-know neurology and psychiatry topics in one complete volume. This new edition is enhanced by an increased number of clinical images, a new section on how to prepare for in-training and board exams, more margin notes, completely updated coverage of

movement disorders, and a web-based component linked to each chapter of the book that includes PowerPoints for residents to use during presentations. Mini-cases highlight frequently tested scenarios and classic patient presentations Written by recent test takers and reviewed by top faculty to assure the most up-to-date and relevant material possible

The most complete and thorough review for the PANCE and PANRE – enhanced by a new test-simulating CD-ROM NEW question-packed CD-ROM 1300 Q&As prepare you for what you will see on the national certification and recertification exams Each question is accompanied by a detailed, referenced answer Organized by specialty area to help you quickly pinpoint your areas of strength and weakness Valuable chapter on test-taking skills and techniques provides score-boosting hints on how to best prepare for and take the exam NEW! Companion CD-ROM features a complete practice test for the most thorough preparation possible EVERYTHING YOU NEED TO EXCEL! Reviewed by a team of PA students for accuracy and relevancy All questions appear in the style you will see on the actual exam Content is presented in seven logical sections: Internal Medicine, Obstetrics and Gynecology, Pediatrics, Pharmacology, Psychiatry, Surgery, and Basic Science and Health Promotion Includes coverage of internal medicine and surgery subspecialties The content you need to ace the PANCE and PANRE: Test-Taking Skills: Tips and Techniques, Section I - Internal Medicine: Cardiology, Dermatology, Endocrinology, Gastroenterology, Hematology/Oncology, HIV-AIDS, Infectious Disease, Nephrology, Neurology, Pulmonary, Rheumatology, Section II - Obstetrics and Gynecology Section III: Pediatrics, Section IV - Pharmacology; Section V - Psychiatry; Section VI - Surgery: Emergency Medicine, General and Vascular Surgery, Orthopedics, Otolaryngology, Urology, Section VII - Health Promotion and Disease Promotion, Section VII - PRACTICE TEST, Index

Prepare Early...Score Higher Completely revised and small enough to fit in a lab coat pocket, this review of Pediatrics features 500 questions with answers and explanations, including 200 new questions in clinical vignette format. All questions are reviewed by recent USMLE Step 2 test-takers.

This new addition to the Step-Up series uses a case-based format to parallel the manner in which interns learn and the thought processes interns employ when seeing a patient. Each case presentation includes a work-up, diagnosis, and treatment. Each case presentation also includes a discussion of the multiple medical problems possible and the reason why they are or are not a component of the final diagnosis. The content focuses on subjects most commonly tested on the USMLE Step 3. Quick Hits, buzzwords, mnemonics, acronyms, and lists are used throughout the text. A companion Website will offer the fully searchable text and color photographs.

Developed by the American Medical Association 's Accelerating Change in Medical Education Consortium, Health Systems Science is the first text that focuses on providing a fundamental understanding of how health care is delivered, how health care professionals work together to deliver that care, and how the health system can improve patient care and health care delivery. Along with basic and clinical science, Health Systems Science (HSS) is rapidly becoming a crucial "third pillar" of medical science, requiring a practical, standardized curriculum with an emphasis on understanding the role of human factors, systems engineering, leadership, and patient improvement strategies that will help transform the future of health care and ensure greater patient safety. Complete coverage of the evolving field of HSS includes patient safety, quality improvement, evidence-based medicine, value in health care, interprofessional teamwork, stewardship of health care resources, population management, clinical informatics, care coordination, leadership, and health care financing/reform. Patient improvement strategies incorporates checklists, information technology, team training, and more. A consistent chapter template provides clear coverage of each topic, including Learning Objectives, Chapter Outline, Core Chapter Content, Summary, Questions for Reflection, and Annotated Bibliography and References. Highly relevant content applicable to today 's evolving health care delivery written by experts in key,

emerging areas of HSS. Developed in partnership with the AMA ' s Accelerating Change in Medical Education Consortium, at the forefront of change and innovation in medical education.

Since 1975, when the University of Oklahoma faculty created their review course for second-year medical students, the Oklahoma Notes have been among the most trusted and widely used reviews for the National Boards. Each Oklahoma Notes book presents the core information of one segment of the medical school curriculum. Written by some of the most effective medical educators in the country, the Oklahoma Notes feature: Concise text presented in outline format for rapid review; contents oriented to promote Boards success; self-assessment questions geared to the current format of the NBME exam; more tables and figures designed to facilitate self-assessment and review; and low-cost, complete coverage of each subject. In 1993, Springer-Verlag launched the first five Oklahoma Notes to cover the clinical sciences: General Surgery, Internal Medicine, Neurology and Clinical Neuroscience, Pediatrics, and Psychology. Obstetrics and Gynecology continues the expansion into the clinical sciences.
