Unlike Freud, Horney does not regard neurosis as rooted in instinct. In her words, her theory is constructive because "it allows us for the first time to tackle and resolve neurotic hopelessness. . . . Neurotic conflicts cannot be resolved by rational decision. . . . But [they] can be resolved by changing the conditions within the personality that brought them into being."

First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

In *Neurosis and Human Growth*, Dr. Horney discusses the neurotic process as a special form of the human development, the antithesis of healthy growth. She unfolds the different stages of this situation, describing neurotic claims, the tyranny or inner dictates and the neurotic's solutions for relieving the tensions of conflict in such emotional attitudes as domination, self-effacement, dependency, or resignation. Throughout, she outlines with penetrating insight the forces that work for and against the person's realization of his or her potentialities. First Published in 1950. Routledge is an imprint of Taylor & Francis, an informa company.

Essays discuss the attention of psychoanalysts, free associations, understanding the patient, the psychoanalytic process, and resistance

Karen Horney (1885-1952) is one of the great figures in psychoanalysis, an independent thinker who dared to take issue with Freud's views on women. One of the first female medical students in Germany, and one of the first doctors in Berlin to undergo psychoanalytic training, she emigrated to the United States in 1932 and became a leading figure in American psychoanalysis. She wrote several important books, including *Neurosis and Human Growth* and *Our Inner Conflicts*. Horney was a brilliant psychologist of women, whose work anticipated current interest in the narcissistic personality. "An excellent book, sophisticated in its judgments, and with a candor that does justice to [Quinn's] courageous subject." □ Phyllis Grosskurth, *The New York Review of Books* "A richly contexted, thoroughly informed, and admirably forthright account of Horney's development and contribution." □ Justin Kaplan "Excellent, sympathetic but not adulatory, clear about the theories and factions... rich in anecdotes." □ Rosemary Dinnage, *The New York Times Book Review* "The whole book is wonderfully balanced. A terrific achievement." □ Anton O. Kris, *Boston Psychoanalytic Institute*

Karen Horney is regarded by many as one of the most important psychoanalytic thinkers of the 20th century. This book argues that Horney's inner struggles, in particular her compulsive need for men, induced her to embark on a search for self-understanding.
