This is a systematic exposition of introductory school algebra written specifically for Common Core era teachers. The emphasis of the exposition is to give a mathematically correct treatment of introductory algebra. For example, it explains the proper use of symbols, why “variable” is not a mathematical concept, what an equation is, what equation-solving means, how to define the slope of a line correctly, why the graph of a linear equation in two variables is a straight line, why every straight line is the graph of a linear equation in two variables, how to use the shape of the graph of a quadratic function as a guide for the study of quadratic functions, how to define a parabola correctly, why the graph of a quadratic function is a parabola, why all parabolas are similar, etc. This exposition of algebra makes full use of the geometric concepts of congruence and similarity, and it justifies why the Common Core Standards on algebra are written the way they are.

Lead between the lines— evaluate Ed policies to emphasize the positives and minimize the negatives Although educational reform is intended for positive change, sometimes it misses the mark. However, when school leaders capitalize on the positive aspects of reforms they can strategize to ensure the best outcomes for students. Christopher Tienken, professor and international speaker, shares his insights on how to identify both positive and negative aspects of education reform to maximize the benefits for students. This book introduces a practical framework for interpreting educational reform within an evidence-based practice, and provides thoughtful ways to finesse results out of challenging policies. Designed for use on the ground level, this book features:

- Seven specific creative compliance strategies to maximize student and educator success
- Case studies that illustrate how to critique reforms and take action
- Reflective questions to guide evaluation and application
- Ethical decision-making checklist

Analyzing both successful and unsuccessful reform ideas from the past, this book champions creative compliance and how to lead innovatively/judiciously.
