Regulation can be a critical barrier to services trade – whether it is too much, too little, discriminatory or otherwise trade-unfriendly. While the AfCFTA Agreement will no doubt reiterate a right to regulate, member countries should focus less on this right, and more on the ability and capacity to implement and enforce regulation that enables safe and efficient services sectors to develop on the continent.

Trade in services and the AfCFTA: No service is an island ...

General Agreement on Trade in Services The WTO's General Agreement on Trade in Services (GATS) entered into force in 1995. It remains the only set of multilateral rules covering international trade in services. The Agreement reflects the gradual transfer of responsibility for many services from government-owned suppliers to the private sector and

Read "Regulating Trade in Services in the EU and the WTO Trust, Distrust and Economic Integration" by available from Rakuten Kobo. This volume assesses the viability of various theories of economic integration that take into account the legal, economi...

Provides commentary and primary source materials on the concepts of international trade in services and the broad legal regime that governs it. This five-volume set is a compilation of global, regional, and European Union legislation that affects international trade in services.

Innovative, interdisciplinary, practitioner-oriented insights into the key challenges faced in addressing the services trade liberalization and domestic regulation interface.

Trade in services, far more than trade in goods, is affected by a variety of domestic regulations, ranging from qualification and licensing requirements in professional services to pro-competitive regulation in telecommunications services. Experience shows that the quality of regulation strongly influences the consequences of trade liberalization. WTO members have agreed that a central task in the ongoing services negotiations will be to develop a set of rules to ensure that domestic regulations support rather than impede trade liberalization. Since these rules are bound to have a profound impact on the evolution of policy, particularly in developing countries, it is important that they be conducive to economically rational policy-making. This book addresses two central questions: What impact can international trade rules on services have on the exercise of domestic regulatory sovereignty? And how can services negotiations be harnessed to promote and consolidate domestic policy reform across highly diverse sectors? The book, with contributions from several of the world's leading experts in the field, explores a range of rule-making challenges arising at this policy interface, in areas such as transparency, standards and the adoption of a necessity test for services trade. Contributions also provide an in-depth look at these issues in the key areas of accountancy, energy, finance, health, telecommunications and transportation services.

The World Trade Organisation plays the primary role in regulating international trade in goods, services and intellectual property. Traditionally, international trade law and regulation has been analysed primarily from the trade-in-goods perspective. Services are becoming an important competence for the WTO. The institutional, legal and regulatory influence of the General Agreement on Trade in Services (GATS) on domestic economic policymaking is attracting increasing attention in the academic and policymaking literature. The growing importance of services trade to the global economy makes the application of the GATS to trade in services an important concern of international economic policy. The GATS contains important innovations that build on the former GATT and existing WTO/GATT trade regime for goods. This book fills a void in the academic and policymaking literature by examining how the GATS governs international trade in services and its growing impact on the regulatory practice of WTO member states. It offers a unique discussion of the major is-sues confronting WTO member states by analysing the GATS and related international trade issues from a variety of perspectives that include law, political economy, regulation, and business. Moreover, the role of the WTO in promoting liberalised trade and economic development has come under serious strain because of the breakdown of the Doha Development Round negotiations. The book analyses the issues in the Doha services debate with some suggested policy approaches that might help build a more durable GATS framework. The book is a welcomed addition to the WTO literature and will serve as a point of reference for academics, policymakers and practitioners.

Where To Download Regulating Trade In Services In The Eu And The Wto Trust Distrust And Economic Integration

This collection of essays takes stock of the key challenges that have arisen since the entry into force of the General Agreement on Trade in Services in the mid-1990s and situates them in the context of the WTO's Doha Development Agenda and the proliferation of preferential agreements addressing services today. The multidisciplinary approach provides an opportunity for many of the world's leading experts and a number of new analytical voices to exchange ideas on the future of services trade and regulation. Cosmopolitan approaches to the treatment of labour mobility, the shape of services trade disciplines in the digital age and pro-competitive regulation in air transport are explored with a view to helping readers gain a better understanding of the forces shaping the changes. An essential read for all those concerned with the evolution of the rules-based trading system and its impact on the service economy.

This book synthesises recent work by the OECD analysing services trade policies and quantifying their impacts on imports and exports, the performance of manufacturing and services sectors, and how services trade restrictions influence the decisions and outcomes of firms engaged in international ...

This Research Handbook explores the latest frontiers in services trade by drawing on insights from empirical economics, law and global political economy. The world's foremost experts take stock of the learning done to date in services trade, explore policy questions bedeviling analysts and direct attention to a host of issues, old and new, confronting those interested in the service economy and its rising salience in cross-border exchange. The Handbook's 22 chapters shed informed analytical light on a subject matter whose substantive remit continues to be shaped by rapid evolutions in technology, data gathering, market structures, consumer preferences, approaches to regulation and by ongoing shifts in the frontier between the market and the state.

Mandated standards used for vehicle airbags, International Organization for Standards (ISO) standards adopted for photographic film, de facto standards for computer software--however they arise, standards play a fundamental role in the global marketplace. Standards, Conformity Assessment, and Trade provides a comprehensive, up-to-date analysis of the link between standards, product testing and certification, and U.S. economic performance. The book includes recommendations for streamlining standards development, increasing the efficiency of product testing and certification, and promoting the success of U.S. exports in world markets. The volume offers a critical examination of organizations involved in standards and identifies the urgent improvements needed in the U.S. system for conformity assessment, in which adherence to standards is assessed and certified. Among other key issues, the book explores the role of government regulation, laboratory accreditation, and the overlapping of multiple quality standards in product development and manufacturing. In one of the first treatments of this subject, Standards, Conformity Assessment, and Trade offers a unique and highly valuable analysis of the impact of standards and conformity assessment on global trade.

This volume assesses the viability of various theories of economic integration that take into account the legal, economic, political and social challenges of incorporating free trade with retaining the plurality of social welfare standards and consumer protection. Chapters cover the governance of trade in services at the European and global level; studies on the recent Services Directive and how this interacts with the principle of managed mutual recognition and harmonization in different sectors of trade in services (social services, financial services); the recent case law of the European Courts on the enforcement of the principle of free movement of services and how this accommodates various national public interest concerns; and the interaction of the freedom to provide services with fundamental rights, including social rights. The operation of the principle of managed mutual recognition in other economic integration regimes, in particular in the context of the WTO, is also discussed.

The Manual sets out an internationally agreed framework for the compilation and reporting of statistics on international trade in services in the broad sense. It addresses the growing need, including in international trade negotiations and agreements, for more detailed, comparable, and comprehensive statistics on this type of trade in its various forms. The recommendations will enable countries to progressively expand and structure the information they compile in an internationally comparable way. The Manual conforms with and explicitly relates to the System of National Accounts 1993 and the fifth edition of the IMF's Balance of Payments Manual. It is published jointly by the United Nations, European Union, IMF, OECD, UNCTAD, and World Trade Organization.
