World Tour Achievements (20 / 395) By far, there are more achievements to be had in Rock Band 2 's revamped World Tour than in any other area of the game. Some are pretty easy to get (almost automatic, really), while others rank among the hardest in the game, leading up to the secret "Bladder of Steel" achievement.

them in a way that even the most novice musician can comprehend. ?The only dictionary geared toward the beginner musician ?Gives clear, concise definitions of terms, theories, and instruments, as well as important works, musicians, and composers

A reference guide to the decade's top trends, performers, and sounds, reviews the most influential albums, provides biographical overviews of key artists, and considers how technology and the Internet have impacted the industry.

The use of technology in music and education can no longer be described as a recent development. Music learners actively engage with technology in their music making, regardless of the opportunities afforded to them in formal settings. This volume draws together critical perspectives in three overarching areas in which technology is used to support music education: music production; game technology; musical creation, experience and understanding. The fourteen chapters reflect the emerging field of the study of technology in music from a pedagogical perspective. Contributions come not only from music pedagogues but also from musicologists, composers and performers working at the forefront of the domain. The authors examine pedagogical practice in the recording studio, how game technology relates to musical creation and expression, the use of technology to create and assess musical compositions, and how technology can foster learning within the field of Special Educational Needs (SEN). In addition, the use of technology in musical performance is examined, with a particular focus on the current trends and the ways it might be reshaped for use within performance practice. This book will be of value to educators, practitioners, musicologists, composers and performers, as well as to scholars with an interest in the critical study of how technology is used effectively in music and music education.
