Malaysia is a signatory to UNSCR 1540, and recently passed the Strategic Trade Act 2010 (STA) which comes in to force on 1 October 2010. The Ministry of International Trade and Industry (MITI) established a Strategic Trade Secretariat on 1 August 2010 to coordinate the implementation of the STA, which aims to prevent illicit trafficking of materials linked to WMD, including electronics, avionics and software through Malaysian territory, and to secure trade against terrorist infiltration.

[The Strategic Trade Review](#) is a peer reviewed journal dedicated to strategic trade, export controls, and sanctions. The sixth Spring/Summer 2018 issue features articles on emerging technologies and export controls, cryptosanctions, export control practices in advanced countries, proliferation finance, defense exports, and capacity-building. It also includes a "Practitioners Perspectives" section. The Strategic Trade Review publishes articles from a global authorship. The Review is an essential resource for researchers, practitioners, students, policy-makers, and other stakeholders involved in trade and security.

"The interdisciplinary conference addressed some of the most serious problems affecting sustainable development, issues that must be considered by development projects in order to provide complete solutions. A major motivation for the meeting was to learn from past failures and avoid repeating similar mistakes while attempting to prevent emerging threats to the environmental and ecological systems by developing more constructive and progressive approaches to ensure sustainability"--Publisher information.

The 42nd edition of the SIPRI Yearbook analyzes developments in 2010 in:
· Security and conflicts
· Military spending and armaments
· Non-proliferation, arms control and disarmament
The SIPRI Yearbook contains extensive annexes on the implementation of arms control and disarmament agreements and a chronology of events during the year in the area of security and arms control. Individual purchasers of the print edition will also be able to access the Yearbook online .

This companion provides the most comprehensive and up-to-date comparative overview of the cyber-security strategies and doctrines of the major states and actors in Europe, North America, South America, Africa, and Asia. The volume offers an introduction to each nation's cyber-security strategy and policy, along with a list of resources in English that may be consulted for those wishing to go into greater depth. Each chapter is written by a leading academic or policy specialist, and contains the following sections: overview of national cyber-security strategy; concepts and definitions; exploration of cyber-security issues as they relate to international law and governance; critical examinations of cyber partners at home and abroad; legislative developments and processes; dimensions of cybercrime and cyberterrorism; implications of cyber-security policies and strategies. This book will be of much interest to students and practitioners in the fields of cyber-security, national security, strategic studies, foreign policy, and international relations.

This book focuses on supply chain management in emerging markets. The authors present issues relating to supply chain development covering countries such as Brazil, China, the Czech Republic, Russia, Indonesia, Malaysia, Nepal, Turkey, Egypt and South Africa and focuses on the challenges faced when the supply chain is designed and maintained. Such challenges derive from issues to do with risk, security, quality management and infrastructure among others. Case studies and survey results are presented in chapters which explore practical solutions to these issues. The latter will be of interest not only to local and international managers, but also to students who are interested in emerging economies. The book covers manufacturing, retail and food chains at the local and international levels.

Efforts to use existing trade agreements to build a larger regional agreement face many challenges. This book considers this problem with reference to ASEAN's current agreements with key partners and the interest to build the Regional Comprehensive Economic Partnership (RCEP). The analysis of the options is framed by a focus on the use of supply chains in international business. Issues considered include those related to reductions in tariffs, trade facilitation, the treatment of investment and of services and the definition of rules of origin. The work is informed by case studies of supply chains in automobile and electronics, and in a professional service sector. The book provides a set of priority actions for better progress in taking a bottom-up approach to building RCEP.

This book examines whether India is successfully integrating and adapting to the global strategic management system. It offers essential insights into the evolution of export controls for goods, which may have implications for the development of Weapons of Mass Destruction – an aspect that is especially relevant given India's robust biotechnological, chemical and nuclear industrial base. In security studies, the phrase "strategic trade management" is now slowly replacing the phrase "export control". However, for the policymaking community, export control remains popular, at least for the sake of reference. The book also describes the mechanisms India is adopting in this regard. It demonstrates the shift in the Indian approach to strategic trade management, from an outspoken critic to a supporter. Politically, the country was initially skeptical of the idea of export controls because it was a target of such systems. The book also explains the tools, forces and incentives that moved India to adapt its policy on export controls or strategic trade management.

[In How High the Sky?](#), Thomas Gangale explores the oldest and most intractable controversy in space law: how far up does national airspace go, and where does the international environment of outer space begin?

This report examines Malaysia's early experience of implementing regulatory impact analysis (RIA) to support evidence-based rule making.
