Podiatrists are doctors of podiatric medicine who specialize in treating conditions that affect the feet and ankles. Although some podiatrists work for a medical center, a large number are in a private or group practice. As with other types of medicine, podiatry medical assistants are needed to help a podiatry practice run efficiently.

## **Being a Podiatric Medical Assistant ...**

Quite simply, podiatry is the diagnosis and treatment of the foot. Podiatrists and Chiropractors are part of the same profession, in the UK and Ireland the titles are interchangeable. However, Podiatry is the internationally recognised, professional qualification needed to deliver all aspects of foot care.

## Access Free The Comprehensive Guide To Podiatric Medical Assisting

breaking down each pathology into the following sections: etiology, epidemiology, risk factors, natural history, diagnosis, and treatment. The handbook covers some of the most common pathology including diabetes, infections and wound care, neurology, vascular, dermatology, nails, bone diseases and soft tissue tumors, first ray pathology, forefoot pathology and arthritides, pes planus, pes cavus, Achilles and rearfoot pathology, trauma, pediatrics, radiology, biomechanics, pharmacology, bioinformatics, and much more. This evidence-based handbook includes references from some of the most landmark foot and ankle articles including those from the Journal of Foot and Ankle Surgery (JFAS), Journal of Bone and Joint Surgery (JBJS), and Foot and Ankle International (FAI). Bulleted lists combined with tables and diagrams help organize the material in a quick-reference format for students and residents alike to review high-yield material found on board exams

"Diabetes mellitus is a complex condition with a myriad of complications that manifest in a number of ways. Some of the most devastating complications occur in the feet. Complications of diabetes are a leading cause of amputations of toes, feet and legs. Diabetes can cause peripheral neuropathy resulting in the loss of protective sensation of the feet. Essentially this means that the feet lose their ability to detect pain from tight-fitting shoes, stepping on a tack, a cut from a shard of glass, stubbing a toe, etc. Diabetic Foot Care is a comprehensive guide for diabetic patients and their caregivers. In addition to a basic overview of diabetes and common foot problems related to diabetes, Diabetic Foot Care also includes: Basic care for feet's skin, nails, shoes, and socks Safe exercise and diet tips to promote foot health Guide to finding and seeing a doctor Overview of medications for specific foot problems "--Provided by publisher.
