The Wave Rider A Chronicle Of The Information Age

The Wave Rider was one of the best business reads of the year for me. It ties together the industrial and technological revolution so succinctly and brings back memories of the Internet bubble and boom with real life experiences. We read first hand from Ajit Balakrishnan, a true industry visionary, about what life as a public company is like for ...

The Wave Rider A Chronicle Of The Information Age

The Wave Rider: A Chronicle Of The Information Age: By Ajit Balakrishnan; Macmillan; 2012; Rs 599. Whenever India's information technology story is told, writers --especially of the instant-headline or TV 'breaking news' variety -- tend to think it happened like the Big Bang, with TCS, Infosys and Wipro.

Ajit Balakrishnan is quietly experimenting with the new and fascinating technologies of the Internet in 1995 when the dot-com fever grips the world. Venture capitalists, investment bankers and lawyers pound at the doors of his tiny office in a low-rent area of Mumbai, urging him to take his company public on New York's NASDAQ stock market. Balakrishnan sets out on this enterprise, a path that takes him through the world's financial centres of London, Hamburg, New York, Boston and San Francisco. This story recounts how he battles adversaries many times his size; fends off avaricious lawyers who try to extort money through class action suits in the tough courts of lower Manhattan; rebuffs investment bankers who try to engineer the sale of his company; and tries to make sense of a world where technology and business models change every few months. He steers his company through the financial crashes of 2000 and 2008; watches in awe as terrorists bring down New York's World Trade Centre towers; puzzles over the decline of once famous names such as AOL and Netscape and the rise of new behemoths like Facebook and Google; wrestles with India's legal system; and pushes to bring Rediff into the new world

of the Internet. Gradually, he realizes that the battles he is part of are not just business battles - they signal the dawn of the Information Age.

Stunning full-color photographs capture the transformative power, beauty, and many faces of the ocean wave, from a quiet trickle across tropical sand to a wild slam of storm surf against an Oregon cliff. 20,000 first printing.

This volume problematizes different facets of management education in India---pedagogy, curricula, and disciplinary and institutional practices---from the perspective of the Global South. The essays in this volume bring out the institutional challenges of crafting a relevant academic programme that converses with both national specificities and global realities. Coming from diverse academic specializations, the contributors traverse the interface of their respective disciplines with management education. In doing so, they engage with the ongoing global debate on management education. This volume fills a noticeable gap of serious, scholarly reflection on the state of management education. While there have been sporadic reflections and occasional critiques, a critical stocktaking of the institutional and disciplinary aspects of management education has been long wanting. This volume is of interest to scholars and practitioners of management education across the globe, and is likely to generate debate on its contemporary relevance and future trajectory.

Gaultry enjoyed the simple, pastoral life of a hedge witch, where her most daunting task was to travel to the nearby village to purchase supplies. But her peaceful life is shattered when it becomes entangled in an ancient prophecy--a prophecy which names her and her headstrong twin sister, Mervion, as their nation's salvation...or its destruction. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

In this memorable account of 17 trips he made to Hawaii's North Shore starting in 1974, Bruce Jenkins, considered the Kerouac of surf writers, profiles the area's elite, the superstars who live to conquer Hawaii's deadliest waves. Here are the egoists, stylists, gladiators, and purists of the sport, from big-wave greats Darrick Doerner and Mark Foo to bodysurfer Mark Cunningham and bodyboarder Mike Stewart. Features 77 color photos.

This volume provides a history of the most consequential 35mm motion picture camera introduced in North America in the quarter century following the Second World War: the Arriflex 35. It traces the North American history of this camera from 1945 through 1972--when the first lightweight, self-blimped 35mm cameras became available. Chronicle of a Camera emphasizes theatrical film production, documenting the Arriflex's increasingly important role in expanding the range of production choices, styles, and even content of American motion pictures in this period. The book's exploration culminates most strikingly in examples found in feature films dating from the 1960s and early 1970s, including a number of films associated with what came to be known as the "Hollywood New Wave." The author shows that the Arriflex prompted important innovation in three key areas: it greatly facilitated and encouraged location shooting; it gave cinematographers new options for intensifying visual style and content; and it stimulated low-budget and independent production. Films in which the Arriflex played an absolutely central role include Bullitt, The French Connection, and, most significantly, Easy Rider. Using an Arriflex for car-mounted shots, hand-held shots, and zoom-lens shots led to greater cinematic realism and personal expression.

With its massive faces, punishing rocks, and treacherous currents, Maverick's presents a surfing challenge like no other. Author Matt Warshaw has updated his critically acclaimed illustrated history of Maverick's to cover important recent developments, and we've added a fresh new cover to kick this edition off in style. "A fascinating account," to quote Surfer magazine, it takes "a cue from Sebastian Junger's The Perfect Storm...Warshaw focused on a single event...and expands on it to illuminate an entire culture and its world beyond waves." The event was the death of celebrated surfer Mark Foo, one of those who congregate every winter to test themselves in the dark, foreboding waters. And what unfolds in Maverick's is no less than the story of big-wave surfing, from its ancient Hawaiian origins to modern tow-in riders. It's a book to be enjoyed not only by those who surf deep in the waves, but also by those whose taste for adventure is satisfied deep in the pages of a very good book.

A celebration of forty years of breaking waves furnishes a collection of the finest photographs from Surfer's famed archives, including colorful pages packed with stunning images that have captured surfing's biggest moments and the compelling articles that have provided the voice for generations of surfers. Reprint.

This first novel in Jack Whyte's riveting Arthurian series tells how the story of Camelot may have actually come to be. We all know the story---how Arthur pulled the sword from the stone and how Camelot came to be. But how did it really happen? The Roman citizens of Britain faced a deadly choice: leave to live in a corrupt Roman world, or stay amidst the violence of the warring factions of Picts, Celts, and invading Saxons. For Publius Varrus and Caius Britannicus, there is only one answer. They will stay, try to preserve the best of Roman life, and create a new culture from the wreckage. In doing so, they will plant the seeds of a legend. For these two men are Arthur's great-grandfathers and their actions will shape a nation...and forge the sword known as Excalibur.
